- 49 Historical Summary Tables Covering the Period 1937 - 1986

**Summary  
of  
NOTIFIABLE DISEASES  
UNITED STATES**

**1986**

**(FORMERLY ENTITLED ANNUAL SUMMARY 19\_\_\_\_)**

**U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES  
Public Health Service  
Epidemiology Program Office  
Centers for Disease Control  
Atlanta, Georgia 30333**

The statistical summary of notifiable diseases in the United States is published to accompany each volume of the *Morbidity and Mortality Weekly Report* by the Centers for Disease Control, Public Health Service, U. S. Department of Health and Human Services, Atlanta, Georgia 30333.

**SUGGESTED CITATION**

Centers for Disease Control. Summary of notifiable diseases, United States, 1986. *Morbidity and Mortality Weekly Report* 1986;35(55).

Centers for Disease Control ..... James O. Mason, M.D., Dr.P.H.  
Director

This report was prepared by:

Epidemiology Program Office ..... Carl W. Tyler, Jr., M.D.  
Director

Michael B. Gregg, M.D.  
*Editor, MMWR*

Division of Surveillance and  
Epidemiologic Studies ..... Ruth L. Berkelman, M.D.  
Director

Statistical Services Branch ..... Donna F. Stroup, Ph.D.

## **Foreword**

### ***MMWR Summary of Notifiable Diseases, United States, 1986***

This volume contains summary tables of the official statistics for calendar year 1986 from the *Morbidity and Mortality Weekly Report (MMWR)* reporting system on the occurrence of notifiable diseases in the United States.

Part 1 contains information on morbidity for each of the 49 currently reportable conditions. The tables show the number of cases of notifiable diseases reported to the Centers for Disease Control (CDC) for 1986, as well as the distribution of cases by month, geographic location, and patient's age.

Part 2 contains graphs and maps depicting summary data for many of the reportable conditions described in tabular form in Part 1.

Part 3 includes tables showing the number of cases of notifiable disease reported to CDC and to the National Office of Vital Statistics for the past 50 years. It also has a table of deaths associated with specified notifiable diseases reported to the National Center for Health Statistics for the period 1975-1984.

As the final publication in each volume of *MMWR*, the *Summary of Notifiable Diseases, United States, 19-*, will close out the *MMWR* series for the stated calendar year. The simplification of the publication into summary tables, graphs, and/or maps – rather than also having explanatory text – will allow production to be expedited.

## **Data Sources**

Data on the reported occurrence of notifiable diseases are routinely published in the *MMWR* and compiled in final form in this summary from annual reports submitted by the state and territorial departments of health.

Notifiable disease reports published in the *MMWR* are the authoritative and archival counts of cases. Data from surveillance records for selected diseases, which are useful for detailed epidemiologic analyses, are published on a periodic basis.

The Epidemiology Program Office gratefully acknowledges the CDC units listed below for their contributions of statistical data and/or graphics from surveillance program records. Requests for further information regarding these data should be directed to the appropriate source.

### **Center for Infectious Diseases**

AIDS Program (acquired immunodeficiency syndrome)

Division of Bacterial Diseases (toxic-shock syndrome)

Division of Vector-Borne Viral Diseases (arboviral infections of the central nervous system)

Division of Viral Diseases (animal rabies)

### **Center for Prevention Services**

Division of Quarantine (cholera and plague)

Division of Tuberculosis Control (tuberculosis)

Division of Sexually Transmitted Diseases (gonorrhea, syphilis, chancroid, granuloma inguinale, and lymphogranuloma venereum)

Totals for the United States, unless otherwise stated, do not include data for American Samoa, Guam, Puerto Rico, the Virgin Islands, Commonwealth of the Northern Mariana Islands (CNMI), and the Pacific Trust Territory, which includes the Republic of Marshalls, Republic of Palau, and the Federated States of Micronesia. Data from the Pacific Trust Territory exclude those for CNMI.

Data from California are provisional. The California Department of Health Services should be contacted for final data.

Data in this summary should be interpreted with caution. Some diseases such as plague and rabies that cause severe clinical illness and are associated with serious consequences probably are reported quite accurately. However, diseases such as salmonellosis and mumps that are clinically mild and infrequently associated with serious consequences are less likely to be reported. Additionally, subclinical cases are seldom detected except in the course of special studies. The degree of completeness of reporting is also influenced by the diagnostic facilities available, the control measures in effect, and the interests and priorities of state and local officials responsible for disease control and surveillance. Finally, factors such as the introduction of new diagnostic tests (e.g., for hepatitis B) and the discovery of new disease entities (e.g., infant botulism and legionellosis) may cause changes in disease reporting independent of the true incidence of disease. Despite these limitations, the data in this report have proven to be useful in analyzing trends.

Mortality data are from the National Center for Health Statistics. Each year these data are also published in *Vital Statistics of the United States, Vol. II*.

Data on notifiable diseases before 1960 are obtained from publications of the National Office of Vital Statistics.

Data for the 1986 resident population of states and territories are from the U.S. Bureau of the Census, *Current Population Reports*, Series P-25, No. 1010, *State Population and Household Estimates with Age, Sex, and Components of Change*, and Series P-25, No. 1009, *Estimates of the Population of Puerto Rico and the Outlying Areas: 1980 to 1986*. Estimates for New York City and Upstate New York are from *Current Population Reports*, Series P-26, No. 86-A, *Provisional Estimates of the Population of Counties: July 1, 1986*. Estimates for the resident population, by age, sex, and race, are from Series P-25, No. 1000, *Estimates of the Population of the United States, by Age, Sex, and Race: 1980 to 1986*.

Population data from states in which diseases were not notifiable or not available were excluded from rate calculation. Rates in the *1986 Summary of Notifiable Diseases* were calculated using data for the resident population except for chancroid, gonorrhea, granuloma inguinale, lymphogranuloma venereum, and syphilis, for which only data for the civilian resident population were used.

#### EXPLANATION OF SYMBOLS USED IN TABLES

Data not available .....	NA
No reported cases .....	—
Report of disease not required by state health department (not notifiable) .....	NN

\*Civilian cases only. Age distributions are estimated.

†Data reported by the state of Illinois for the three age groups over 40 years are recorded as 40+. Cases reported in this grouping are as follows: Hepatitis A (75); Hepatitis B (130); Hepatitis non-A, non-B (63); Hepatitis, unspecified (24); Measles (1); Meningococcal infections, civilian (10); Mumps (20); Rubella (2); Salmonellosis (592); Shigellosis (88); Tetanus (5); and Typhoid fever (2).

NOTE: Hepatitis reports for New York City are not available (see footnote, page 6).

AIDS total updated through June 13, 1987.

**Estimates of the resident population of the United States, by age, sex, and race,\* July 1, 1986**

**Graphs and Maps  
for Selected  
Notifiable Diseases  
in the  
United States**

**ACQUIRED IMMUNODEFICIENCY SYNDROME (AIDS) — Cases and known deaths,  
by 6-month periods of report to CDC, United States, 1981-1986**

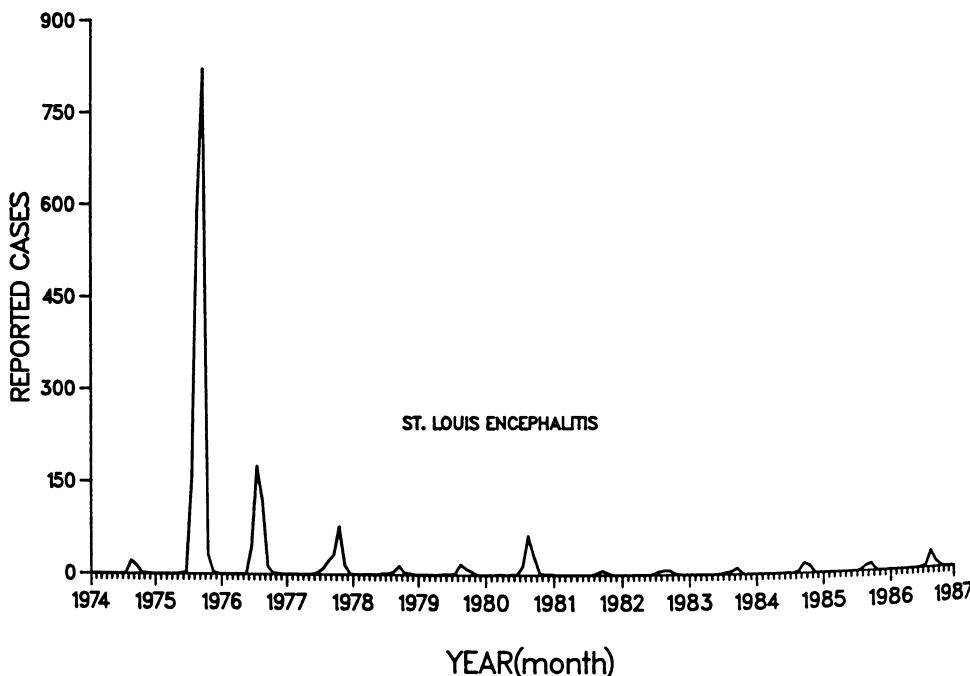

**ACQUIRED IMMUNODEFICIENCY SYNDROME (AIDS) — Cases reported to CDC by state, United States, 1981-1986**

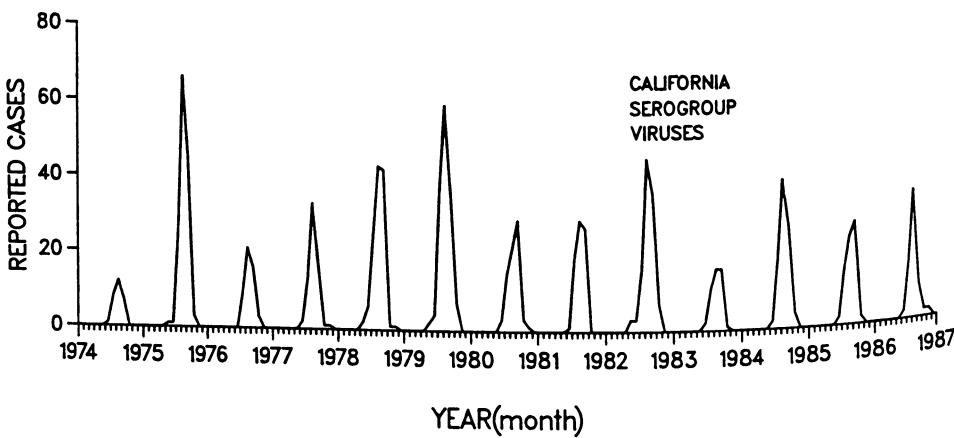

## GRAPHS AND MAPS

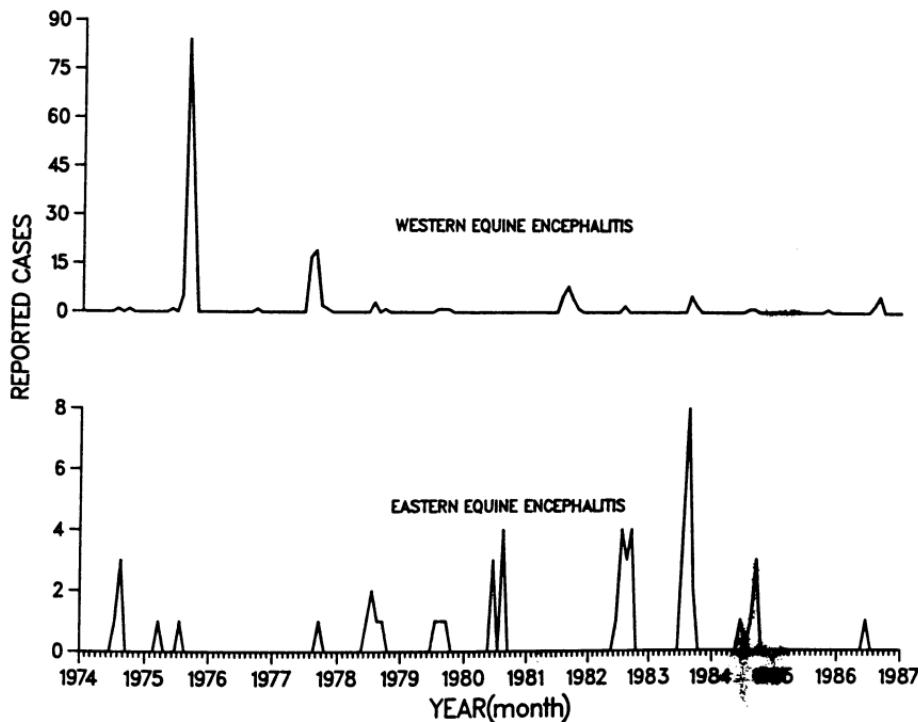

### ARBOVIRAL INFECTIONS (of the central nervous system) — Cases due to St. Louis encephalitis virus, by month, United States, 1974-1986

### ARBOVIRAL INFECTIONS (of the central nervous system) — Cases due to California serogroup viruses, by month, United States, 1974-1986

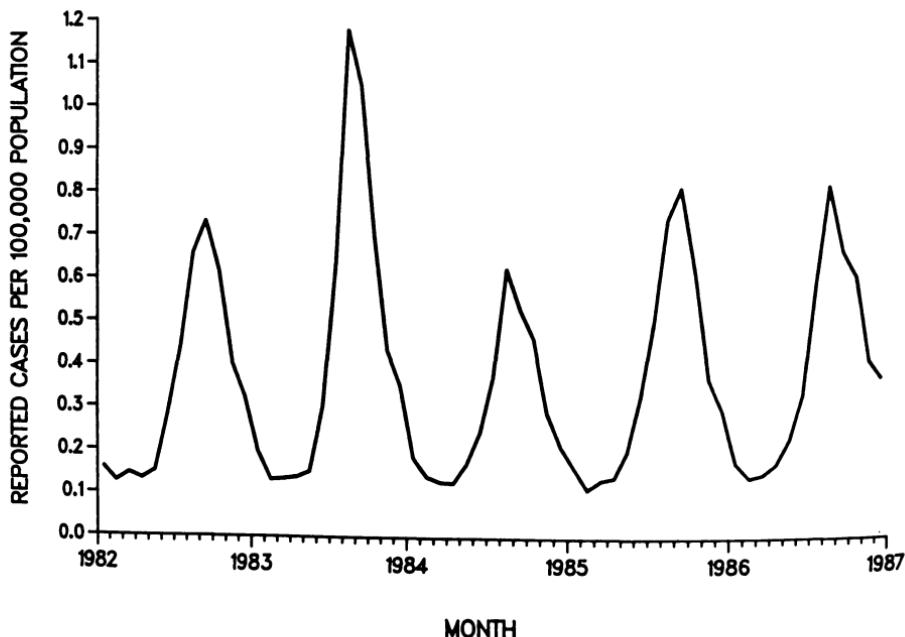

**ARBOVIRAL INFECTIONS (of the central nervous system) – Cases due to Western and Eastern equine encephalitis viruses, by month, United States, 1974-1986**

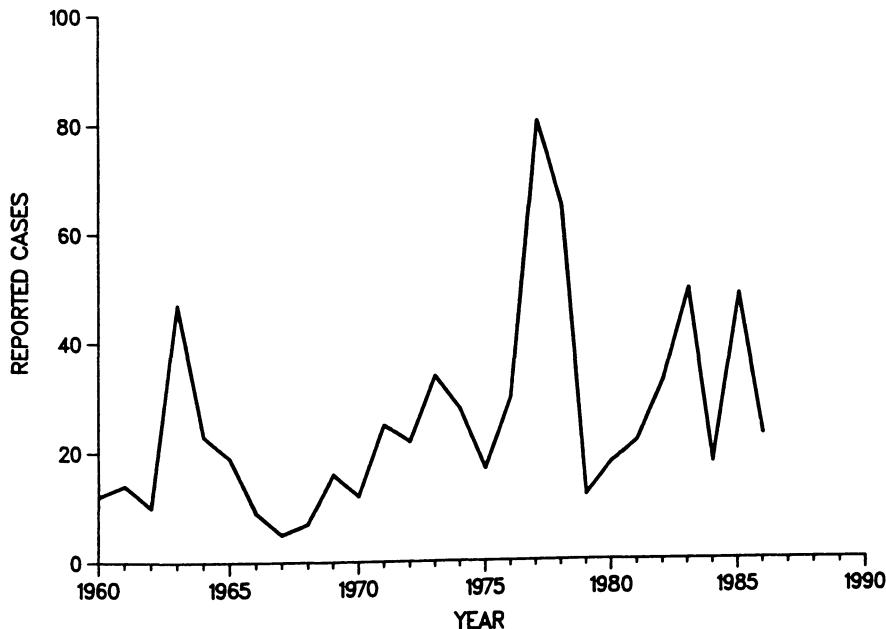

## GRAPHS AND MAPS

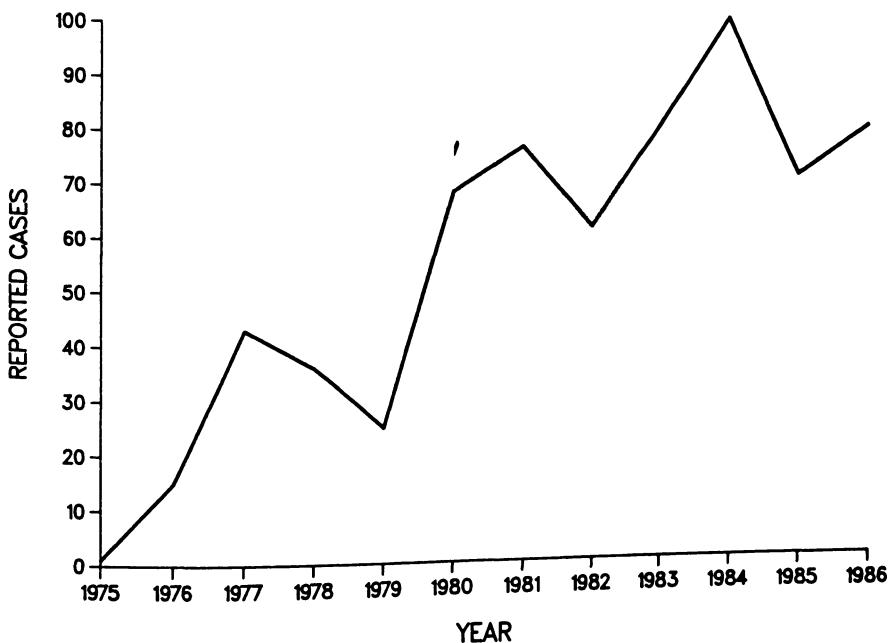

### ASEPTIC MENINGITIS – By month, United States, 1982-1986

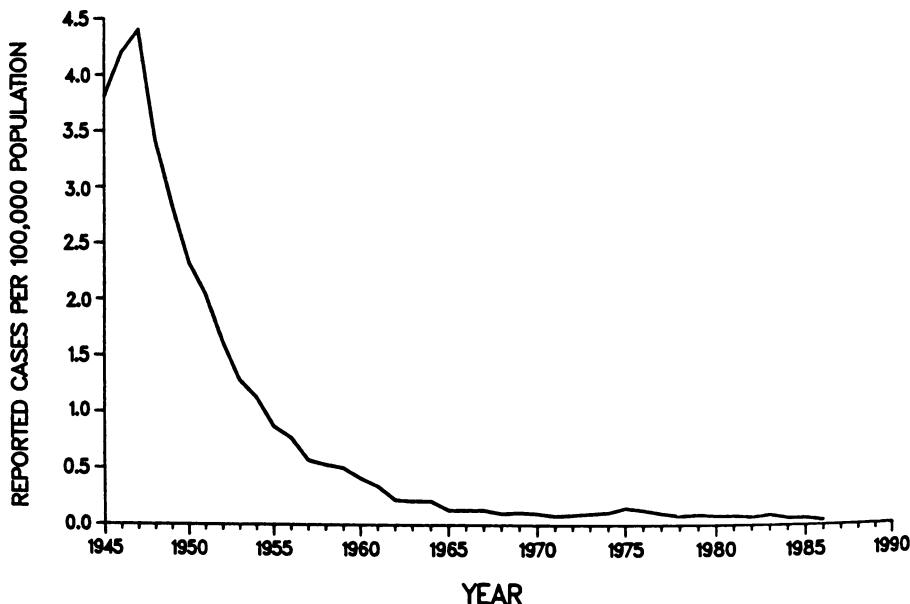

## BOTULISM (foodborne) — By year, United States, 1960-1986

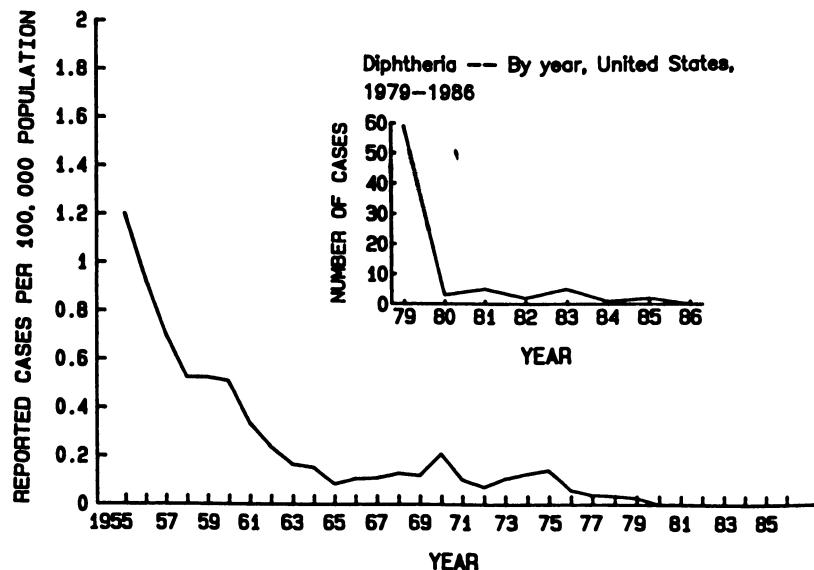

## BOTULISM (infant) — By year, United States, 1975-1986

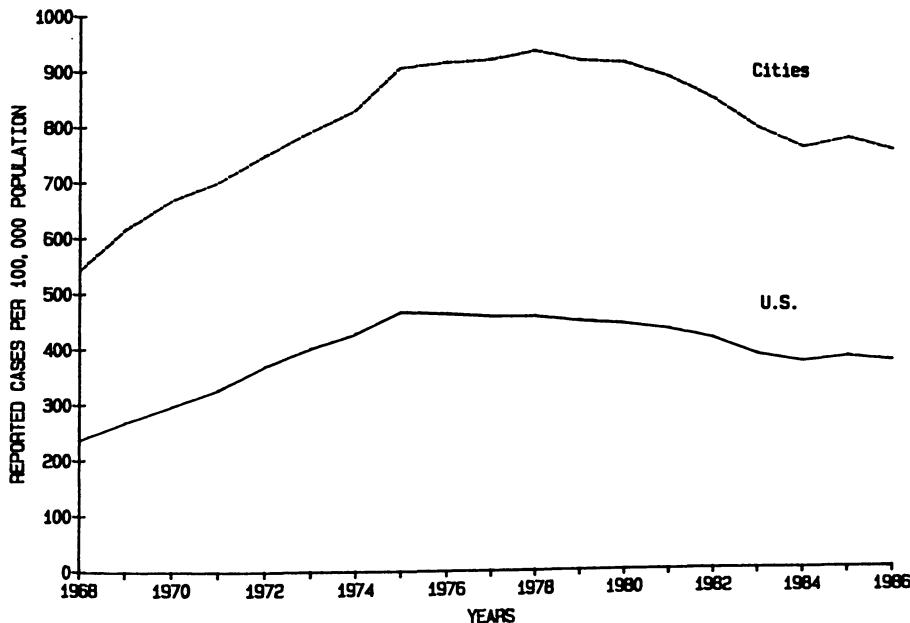

BRUCELLOSIS — By year, United States, 1945-1986

DIPHTHERIA — By year, United States, 1955-1986

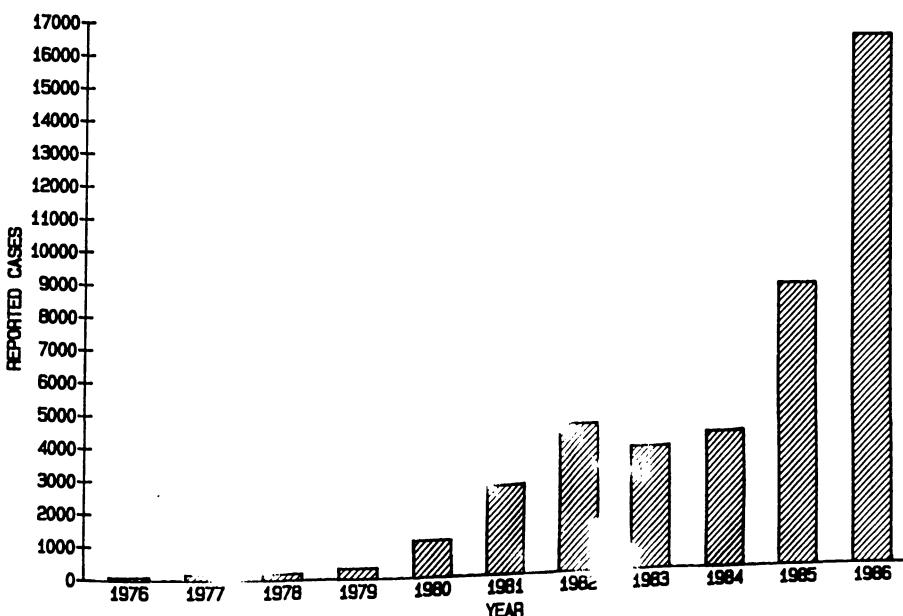

## GONORRHEA — By year, United States and large cities,\* 1968-1986

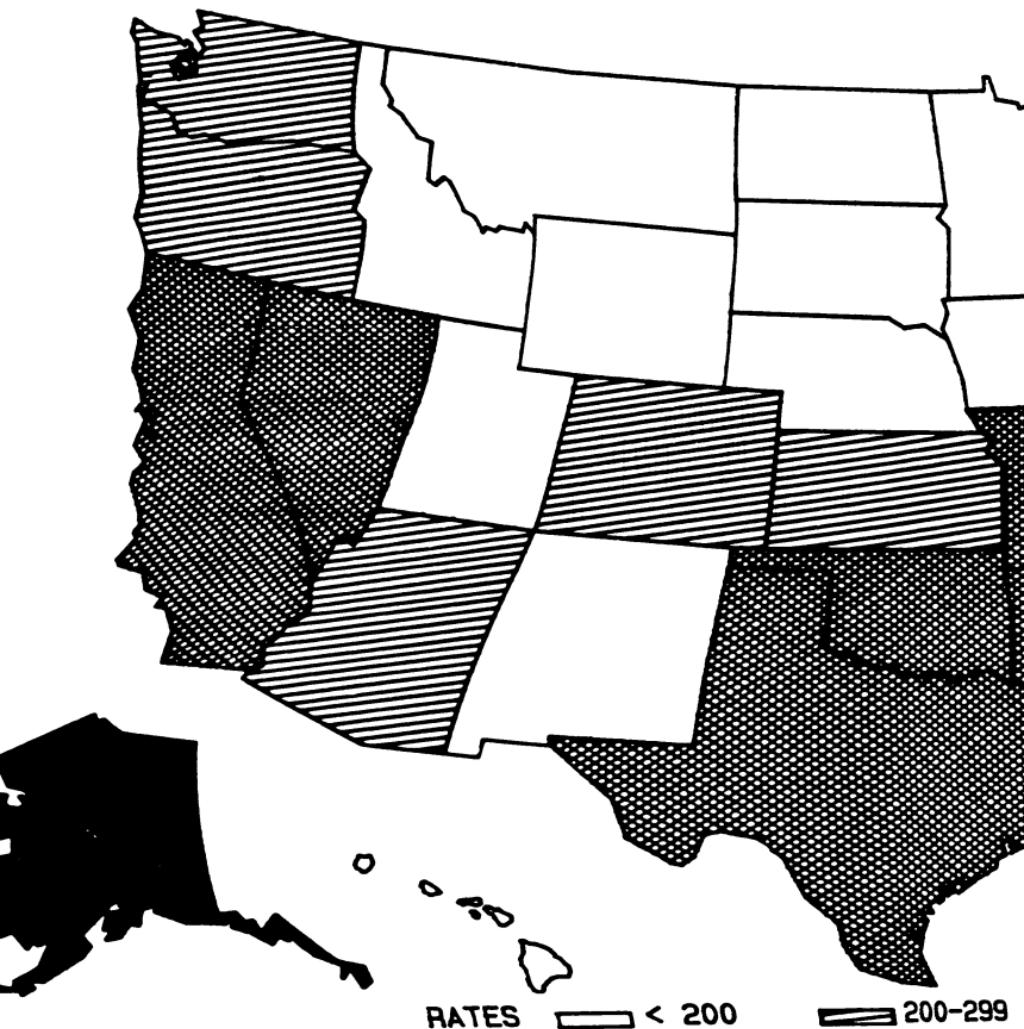

\* Cities with population over 200,000.

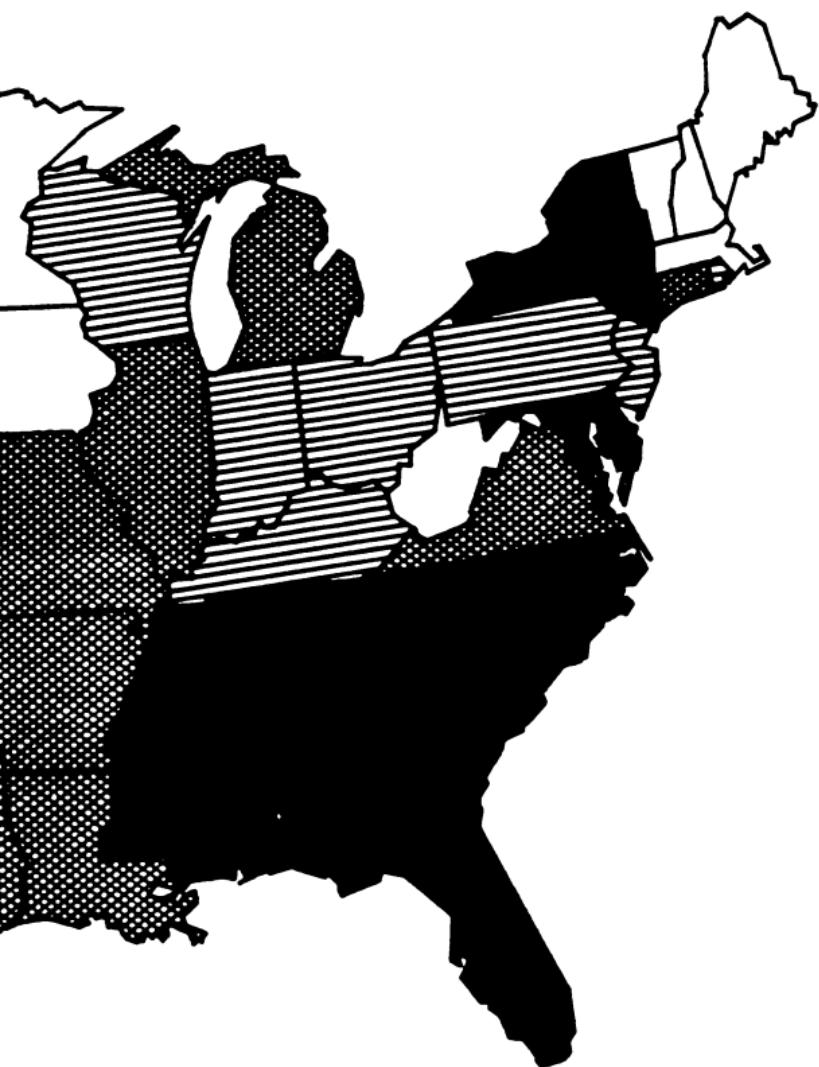

## GONORRHEA — Total resistant strains, United States, 1976-1986

First case reported in March 1976

## GONORRHEA — By state\*, United States, 1986

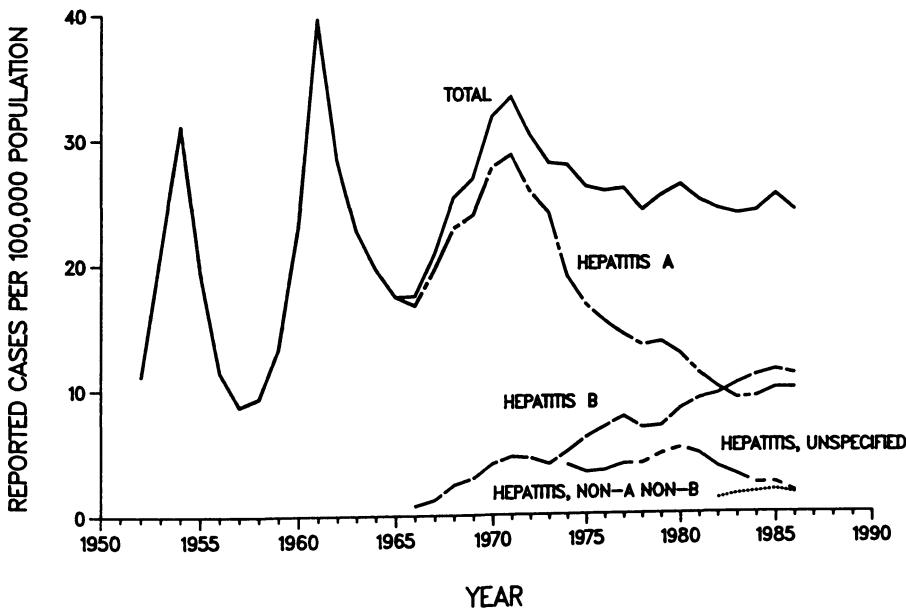

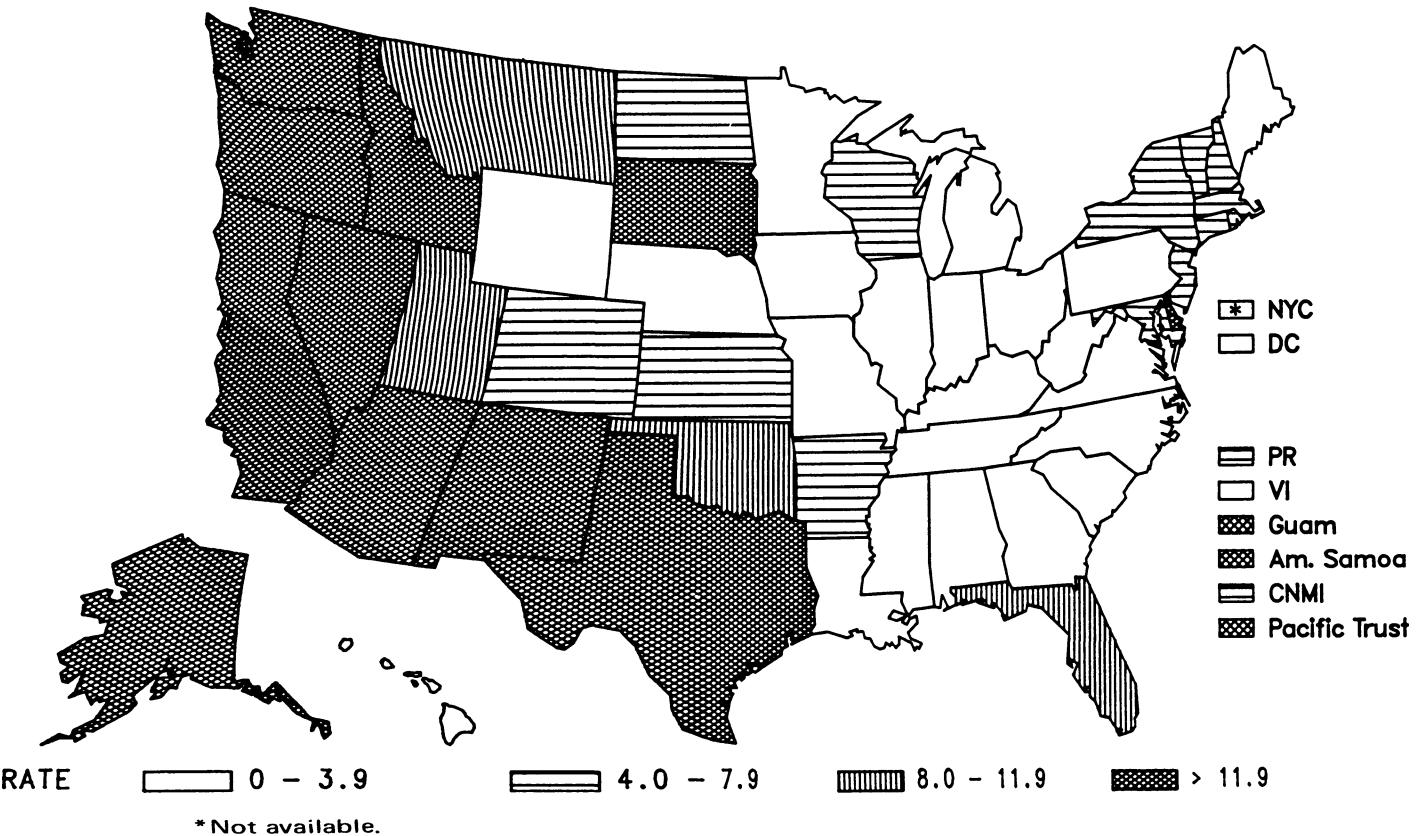

■ 300-499

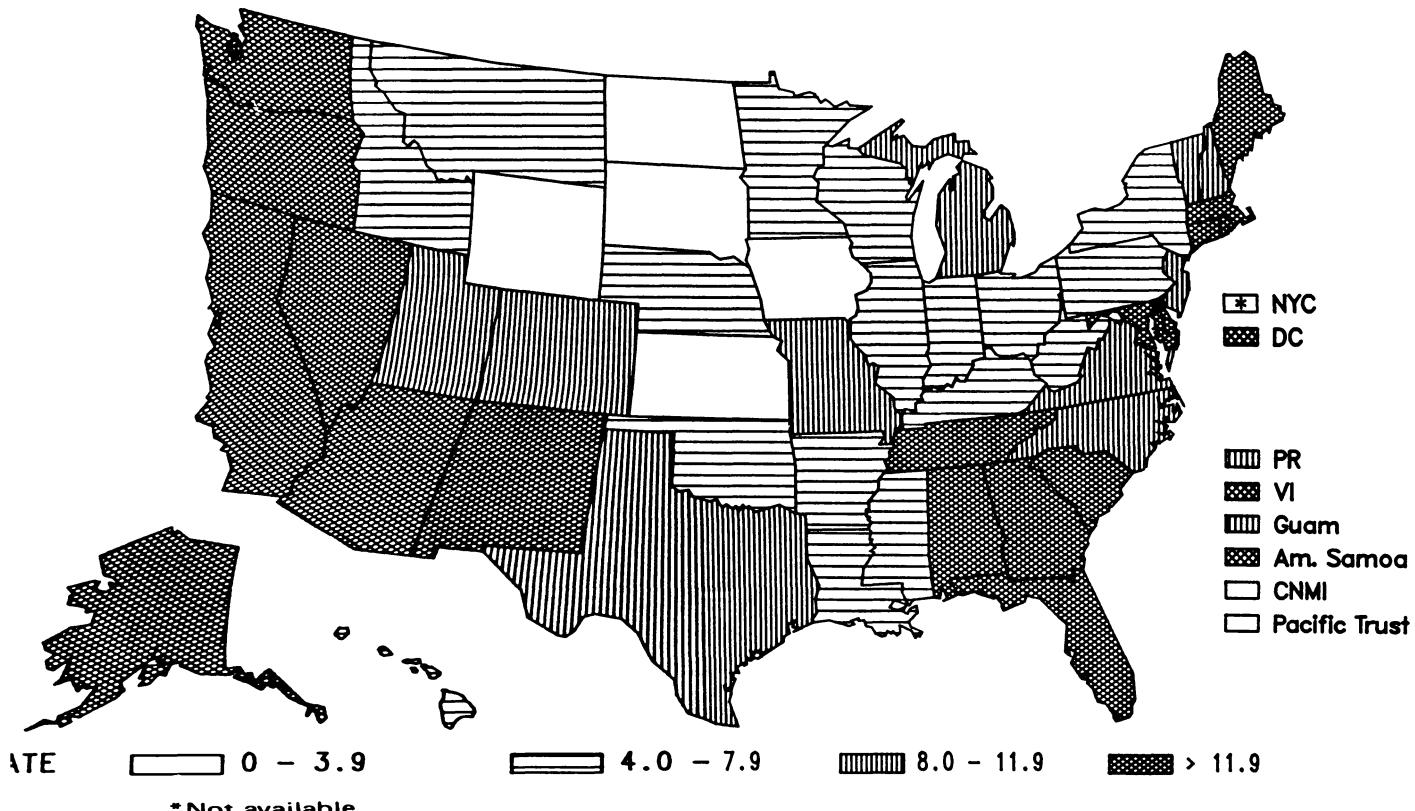

■ > 500

## HEPATITIS – By year, United States, 1952-1986

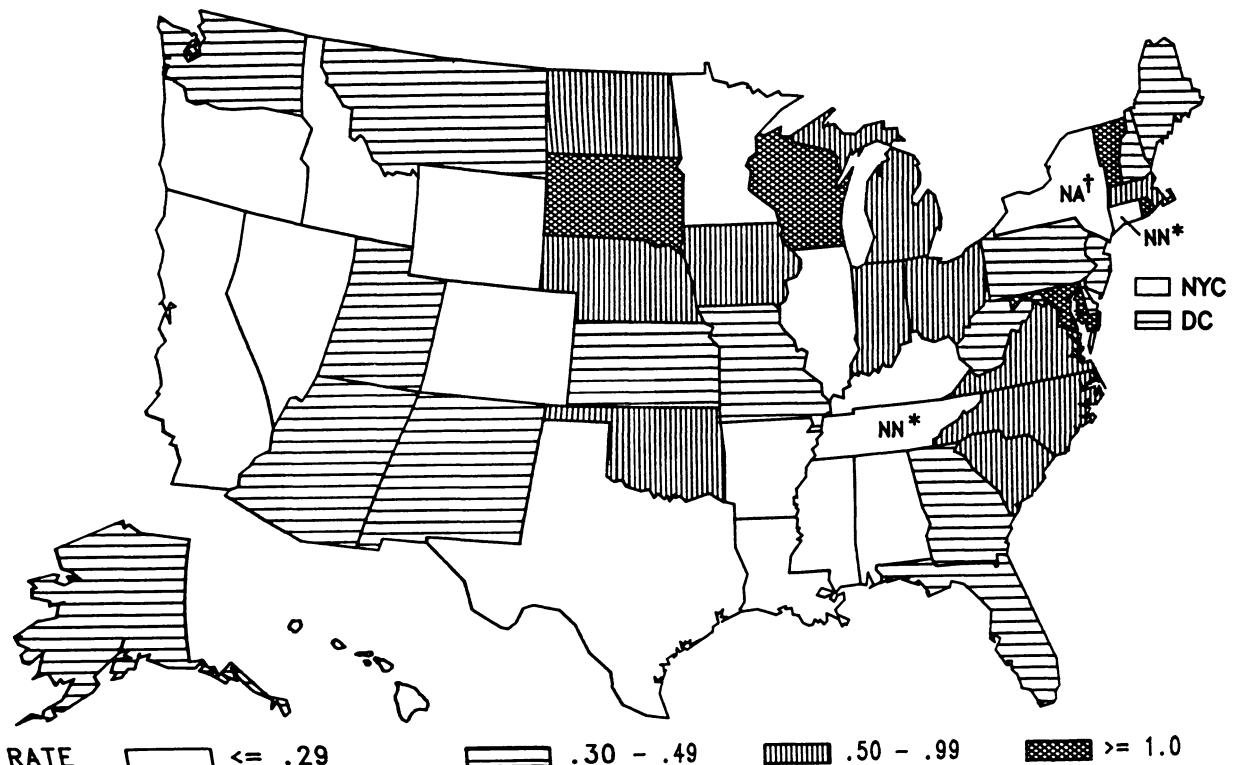

**HEPATITIS A — Reported cases, per 100,000 population, United States, 1986**

**HEPATITIS B – Reported cases, per 100,000 population, United States, 1986**

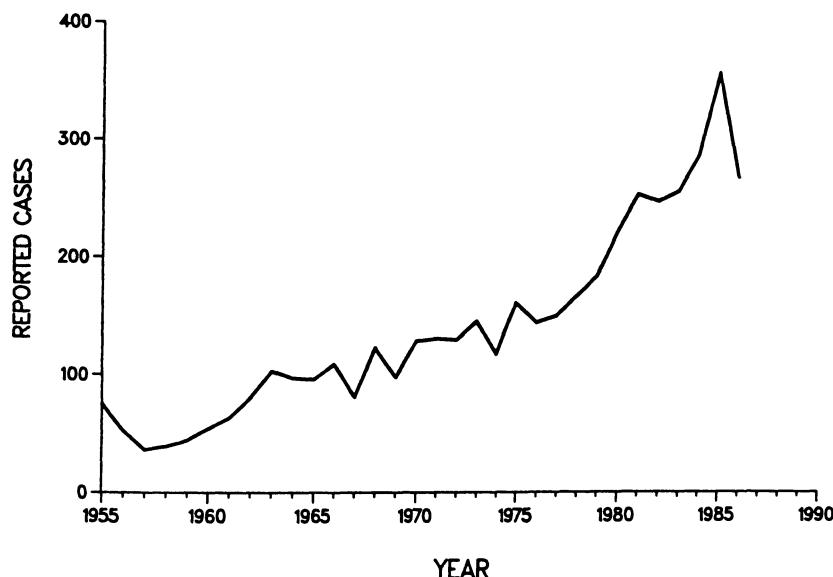

## LEGIONELLOSIS — Reported cases, per 100,000 population, United States, 1986

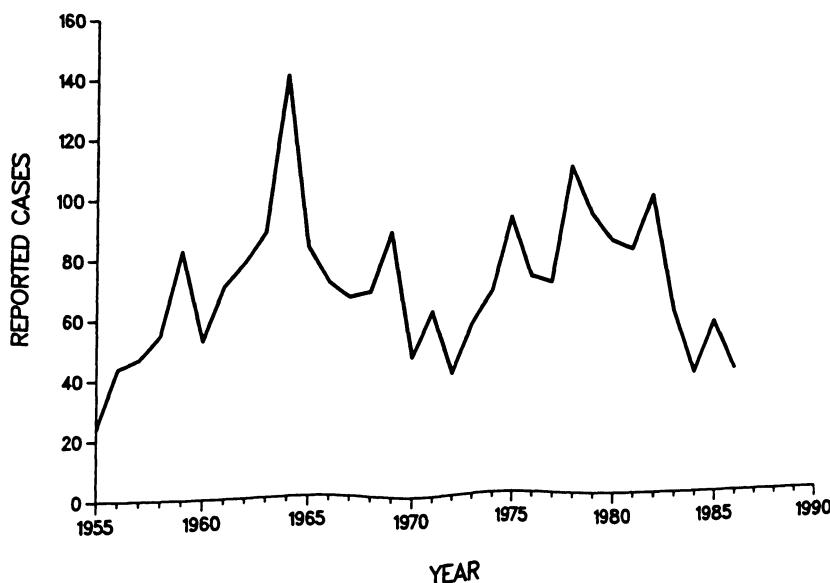

\* Not notifiable.  
† Not available.

## LEPROSY – By year, United States, 1955-1986

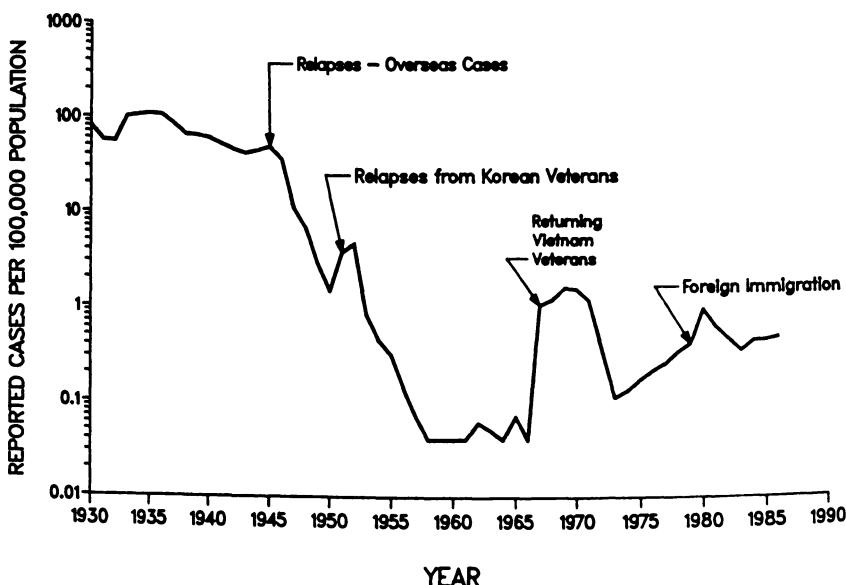

## LEPTOSPIROSIS – By year, United States, 1955-1986

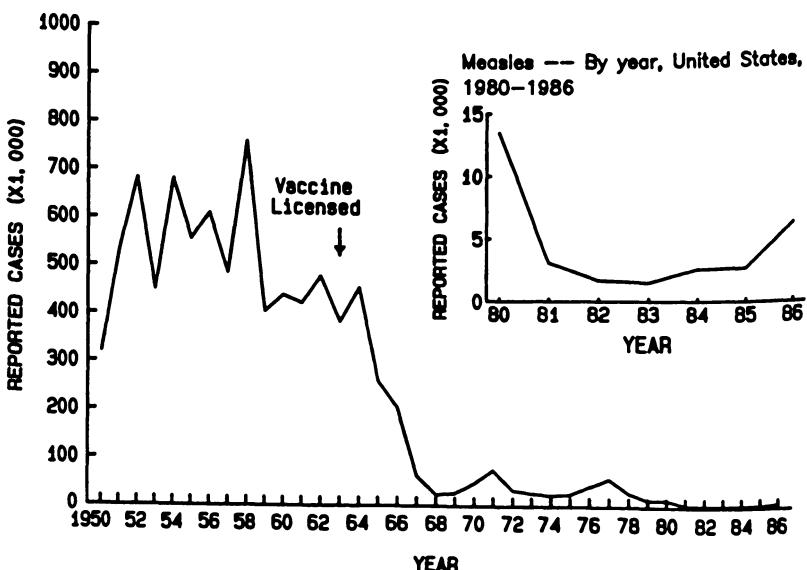

## GRAPHS AND MAPS

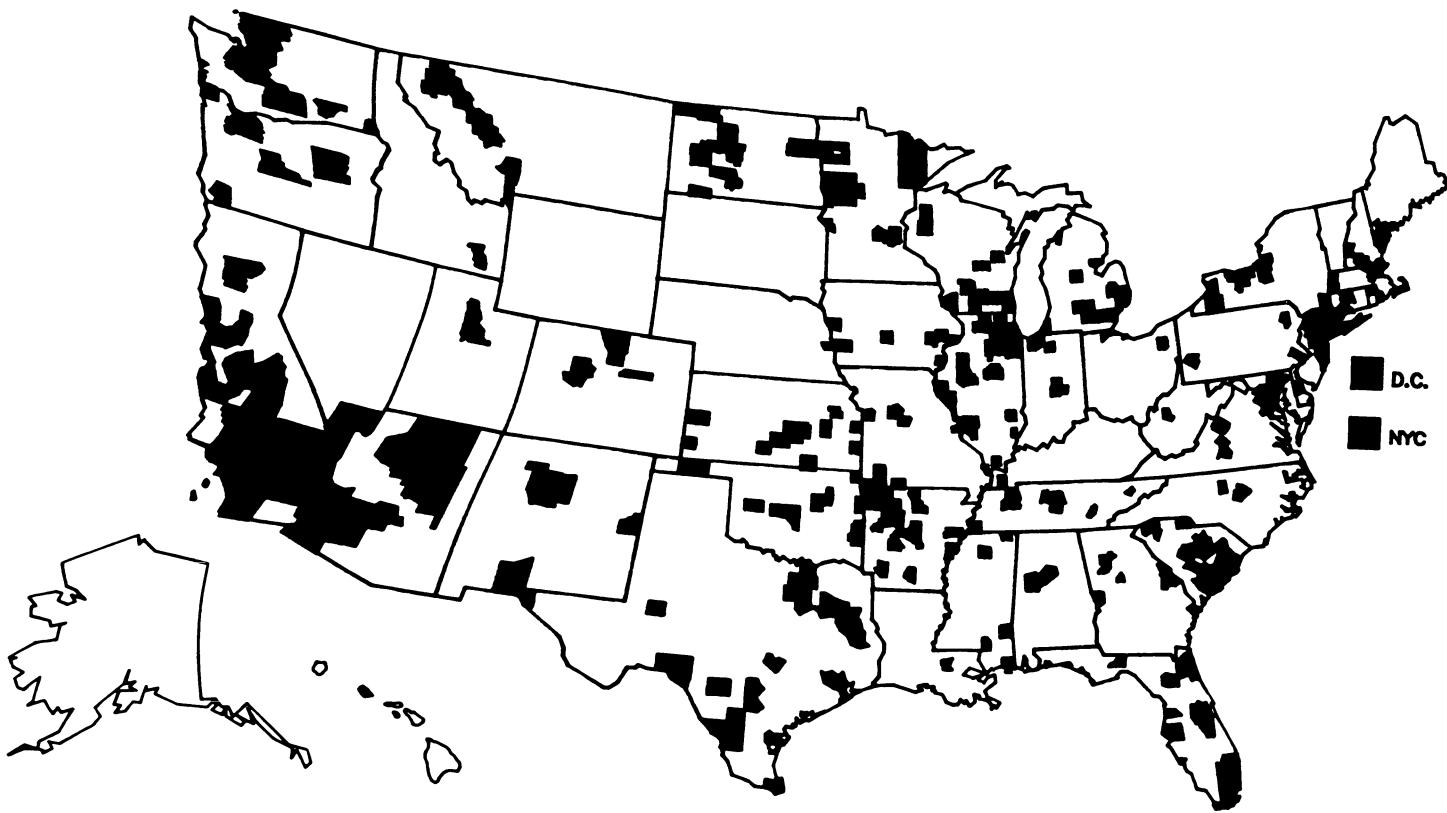

### MALARIA – By year, United States, 1930-1986

### MEASLES (rubeola) – By year, United States, 1950-1986

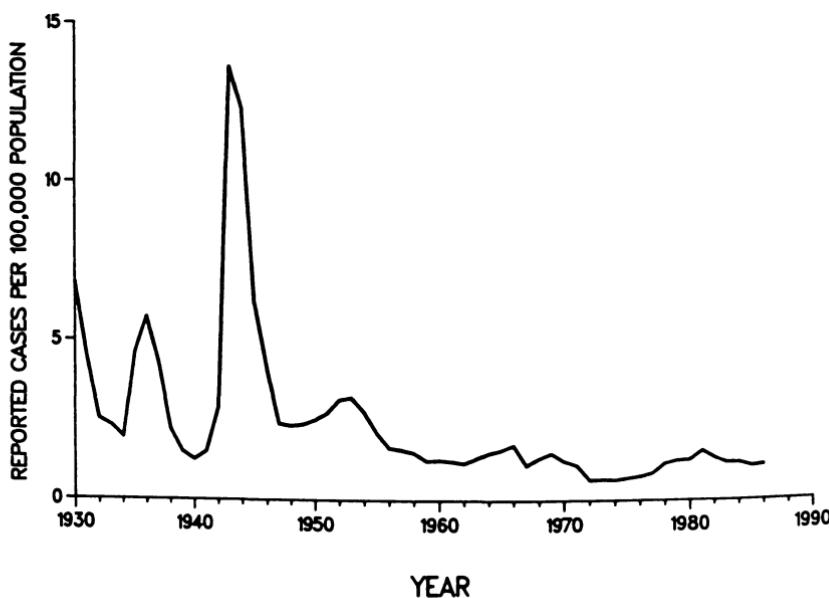

**MEASLES (rubeola) — Counties reporting cases, United States, 1986**

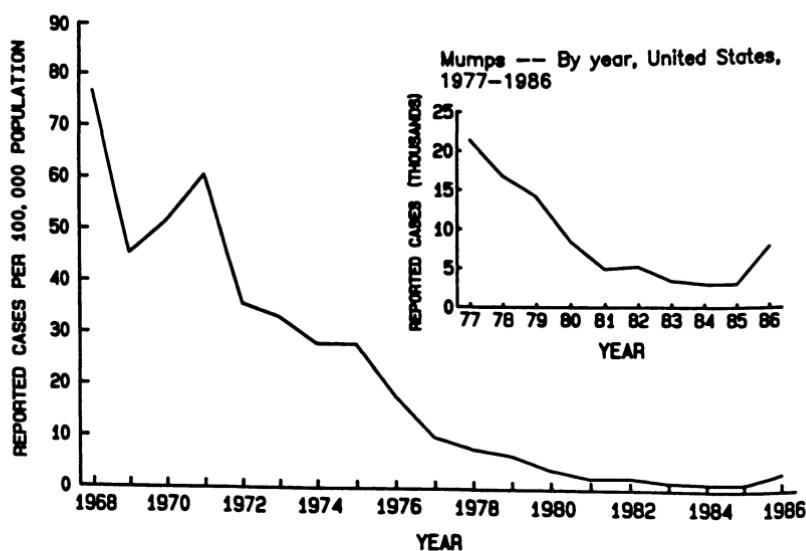

## GRAPHS AND MAPS

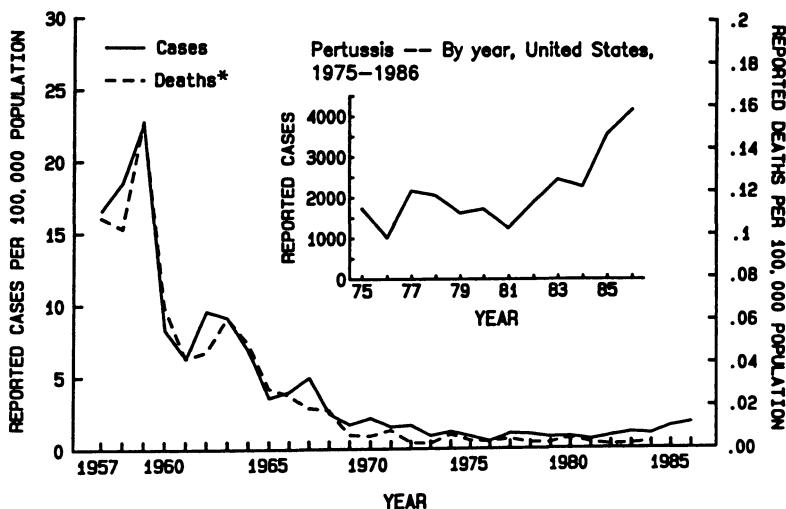

### MENINGOCOCCAL INFECTION — By year, United States, 1930-1986

### MUMPS — By year, United States, 1968-1986

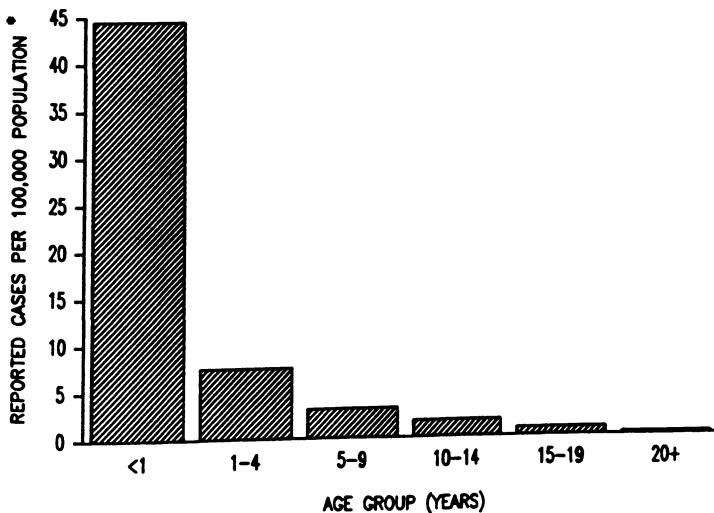

## PERTUSSIS (whooping cough) – By year, United States, 1957-1986

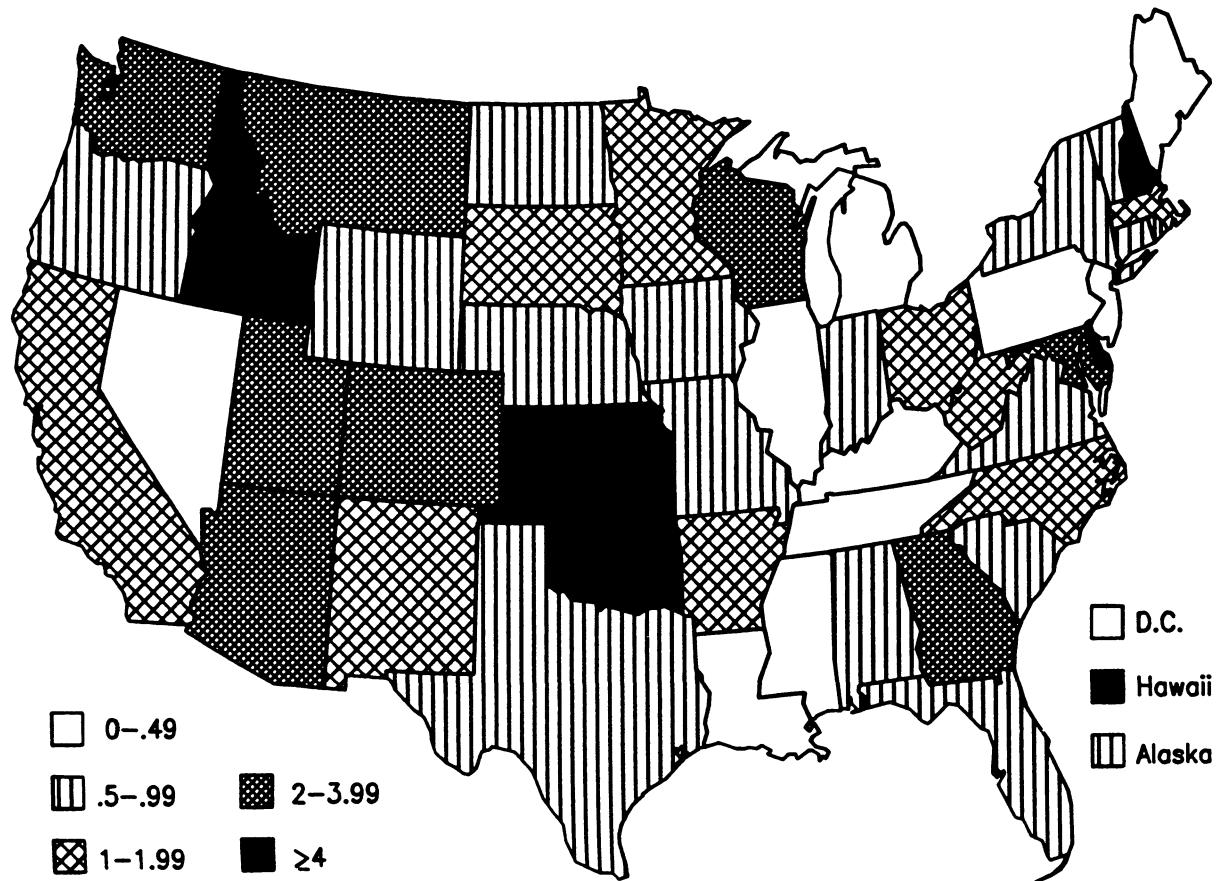

\*Data not available for 1985-86.

## PERTUSSIS (whooping cough) – By age group, United States, 1986

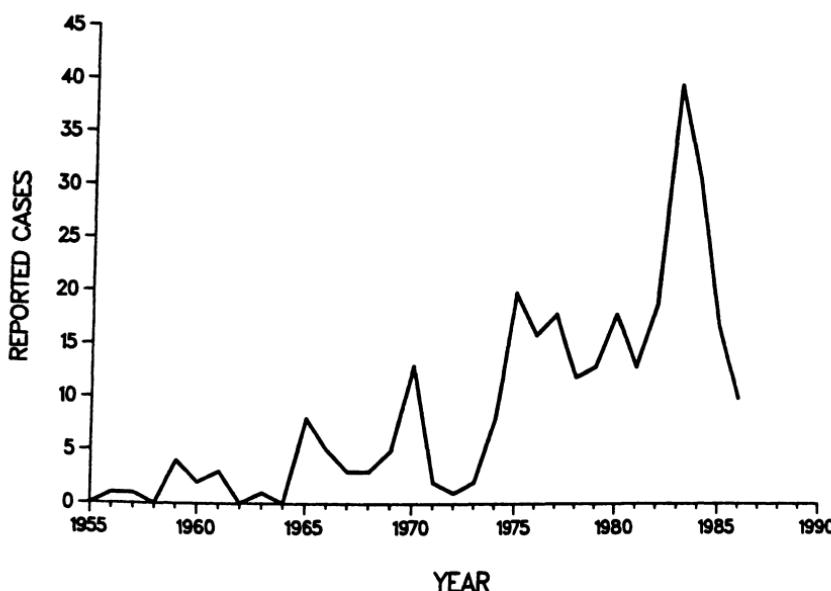

\*Rates were calculated by multiplying the percentage of cases with known age group by total reported cases and dividing by the population in that age group.

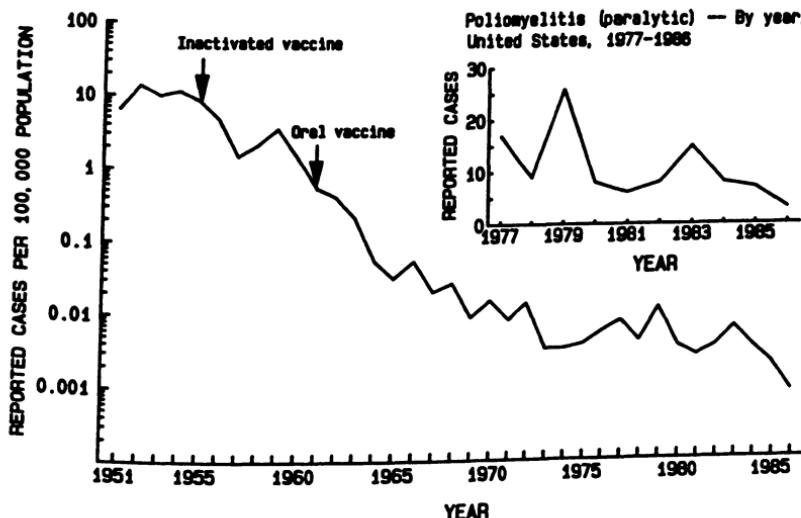

PERTUSSIS (whooping cough) – Reported cases per 100,000 population – States, 1986

## PLAQUE — In humans, by year, United States, 1955-1986

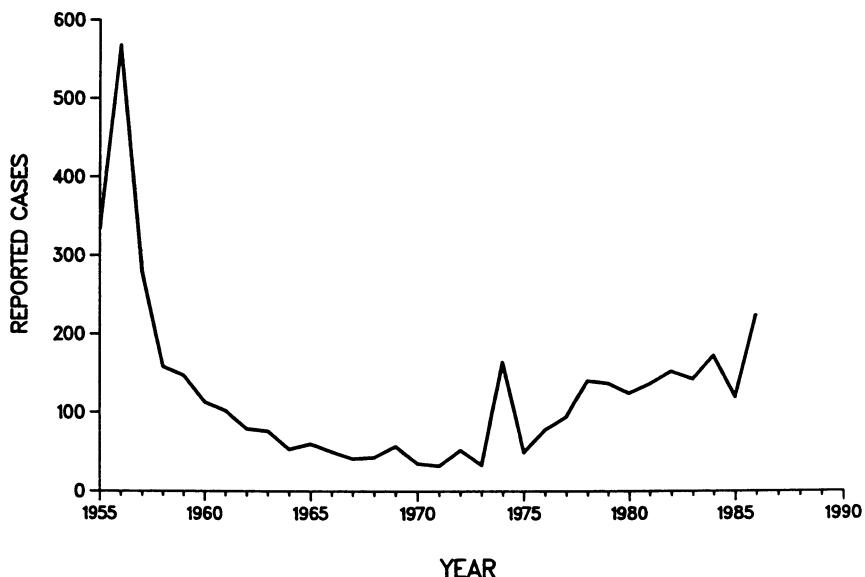

## POLIOMYELITIS (paralytic) — By year, United States, 1951-1986

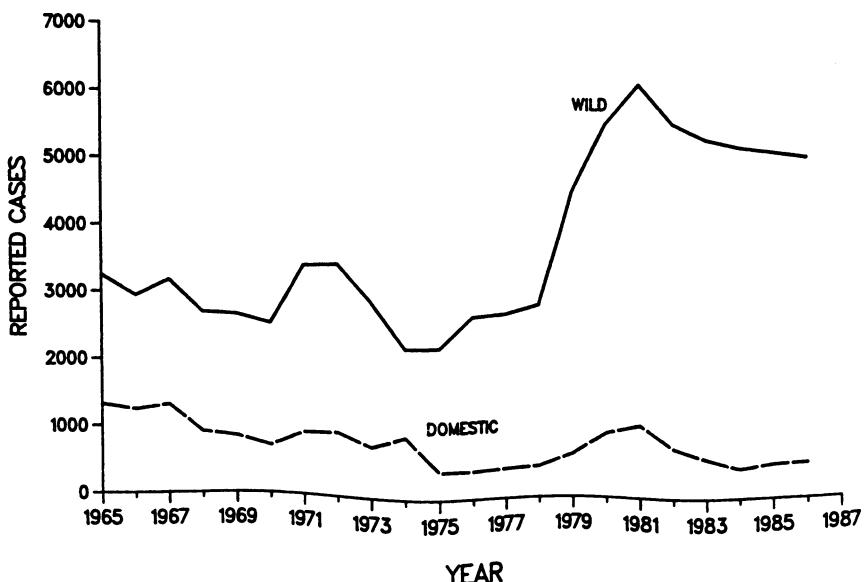

## GRAPHS AND MAPS

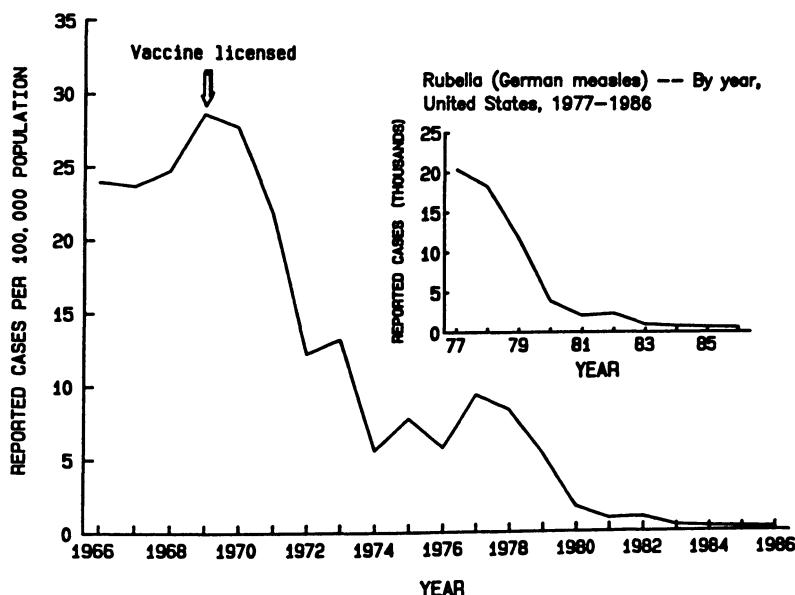

### PSITTACOSIS – By year, United States, 1955-1986

### RABIES – Wild and domestic animals, by year, United States, 1965-1986

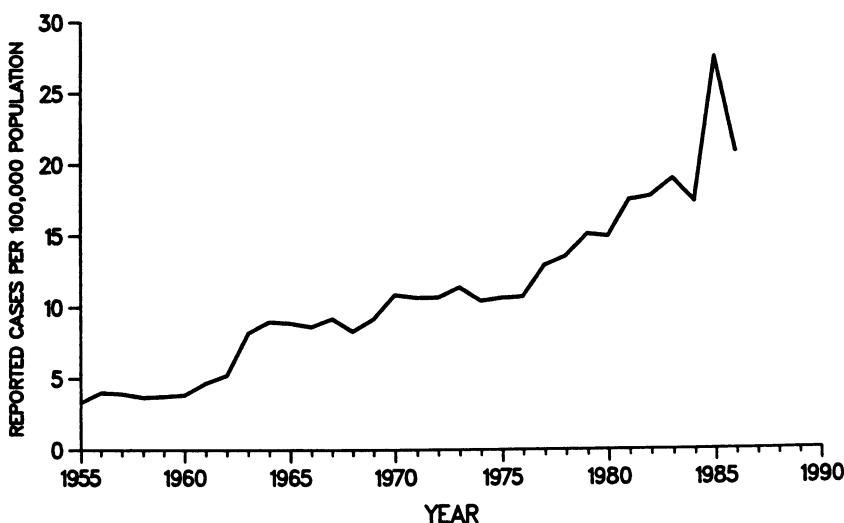

## RUBELLA (German measles) — By year, United States, 1966-1986

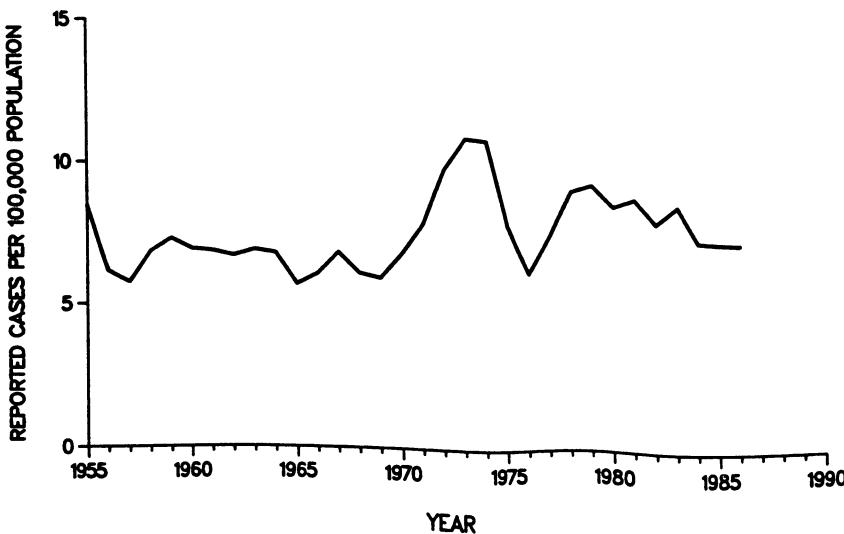

## GRAPHS AND MAPS

### SALMONELLOSIS (excluding typhoid fever) — By year, United States, 1955-1986

### SHIGELLOSIS — By year, United States, 1955-1986

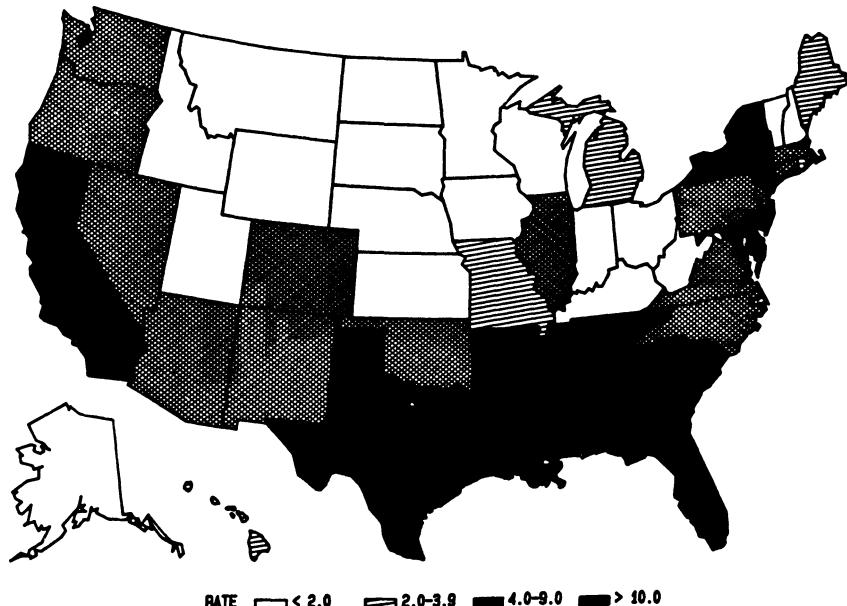

## SYPHILIS (primary and secondary) — By year, United States, 1941-1986\*

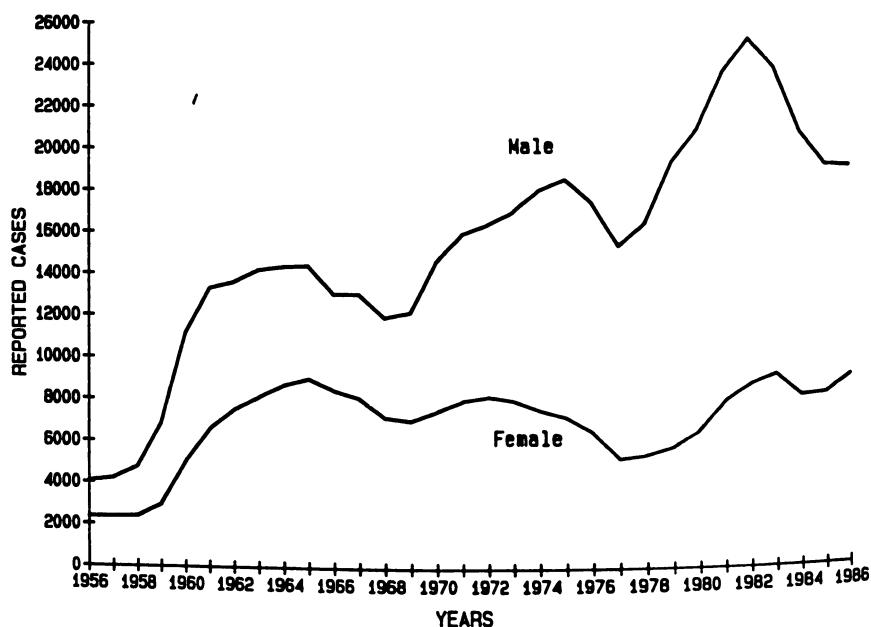

\* 1941-1946 fiscal years (12-month period ending June 30); 1947-1986 calendar years.

## SYPHILIS (primary and secondary) — By State\*, United States, 1986

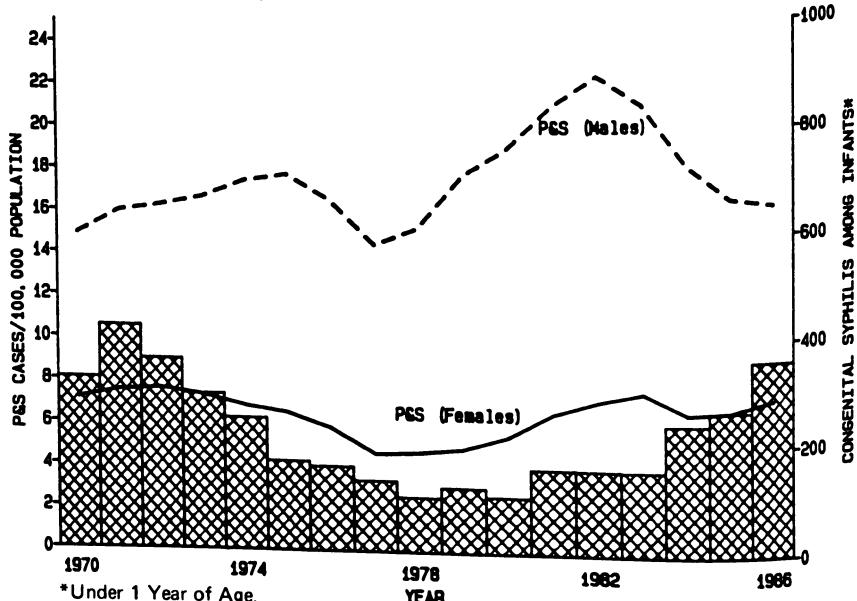

\*Based on reported cases per 100,000 population.

SYPHILIS (primary and secondary) — By sex, United States, 1956-1986

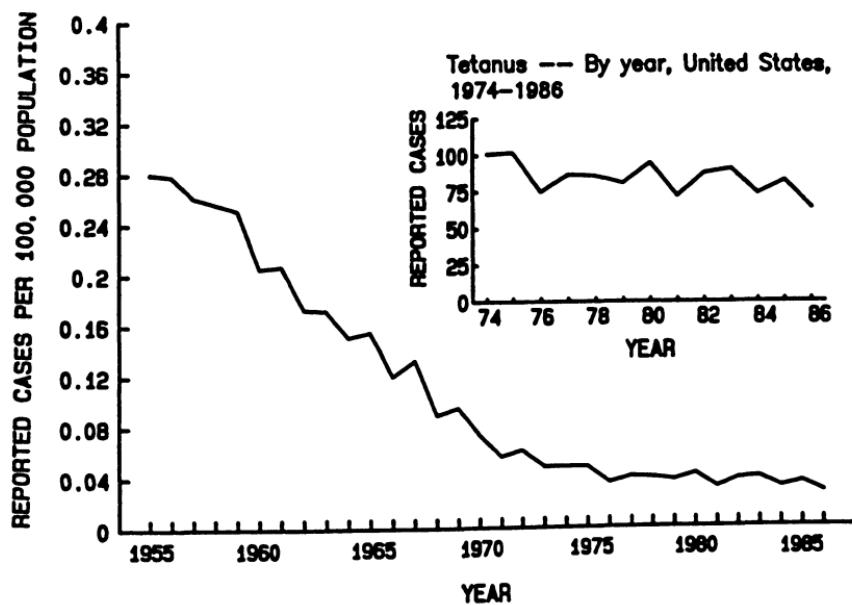

SYPHILIS, PRIMARY AND SECONDARY (P&S) — By sex, and congenital syphilis (under 1 year), United States, 1970-1986

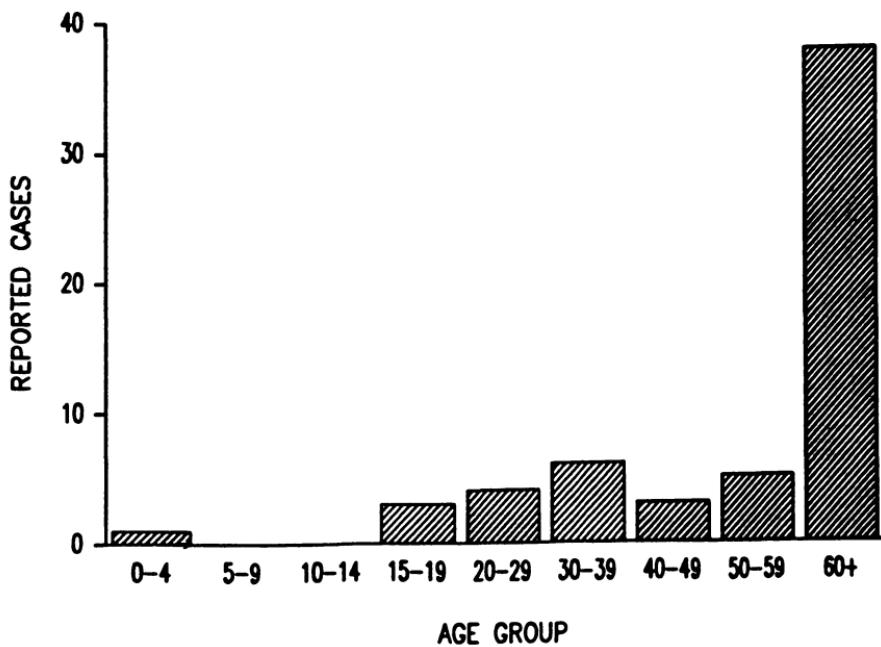

\*Under 1 Year of Age.

## TETANUS — By year, United States, 1955-1986

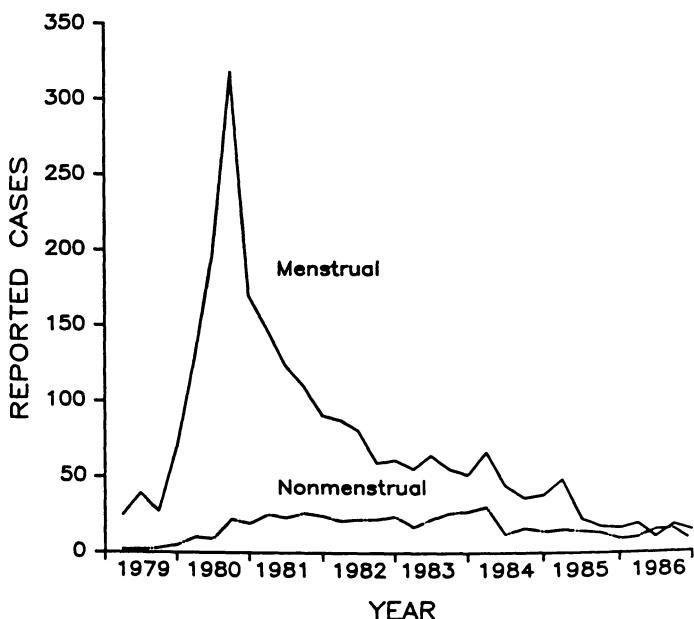

## TETANUS — By age group, United States, 1986

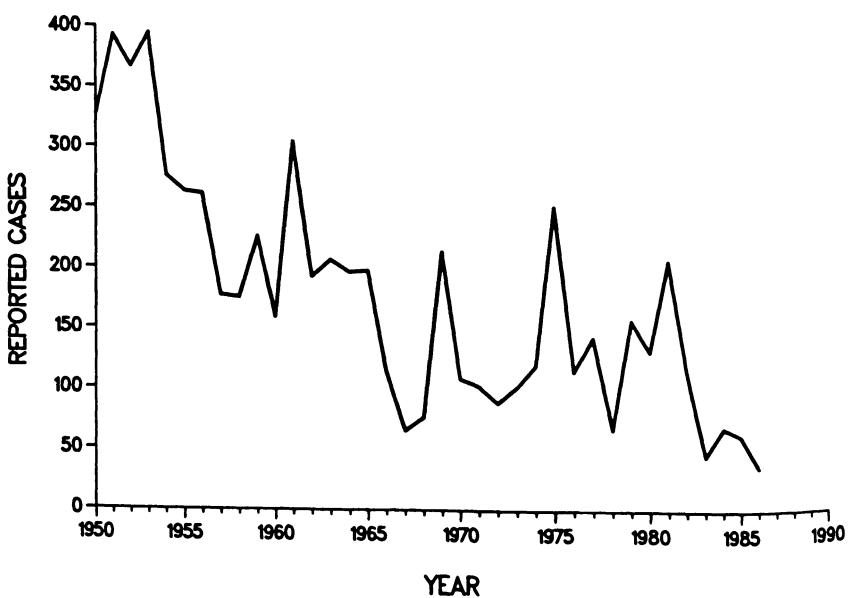

## GRAPHS AND MAPS

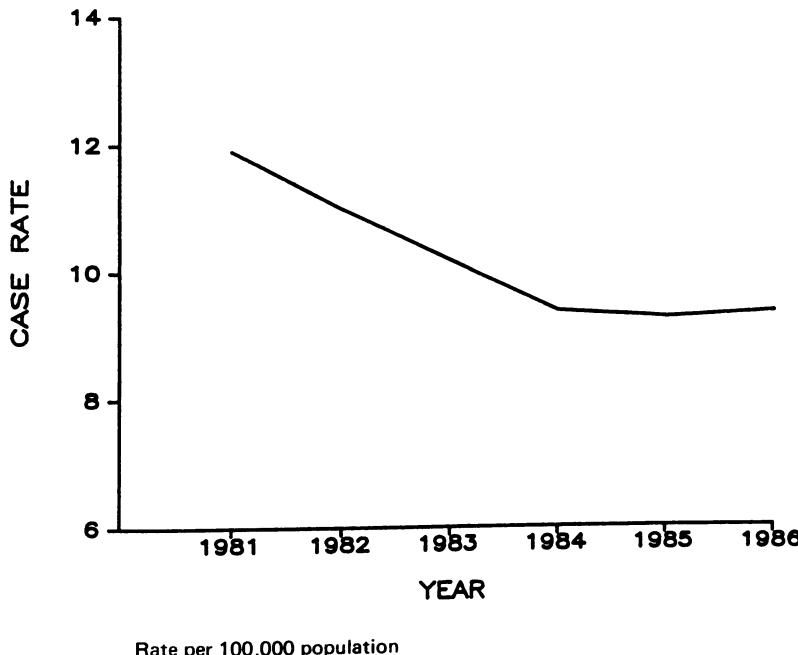

### TOXIC SHOCK SYNDROME – By year, United States, 1979-1986

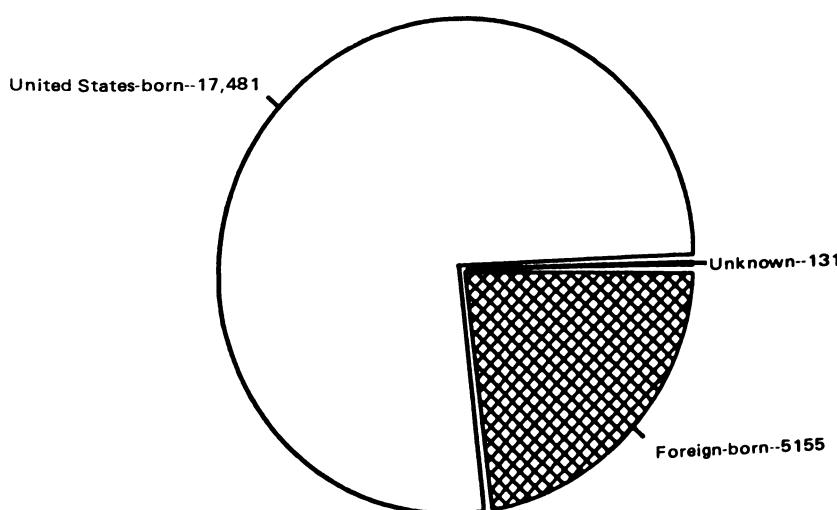

### TRICHINOSIS – By year, United States, 1950-1986

## TUBERCULOSIS — Case rates, United States, 1981-1986

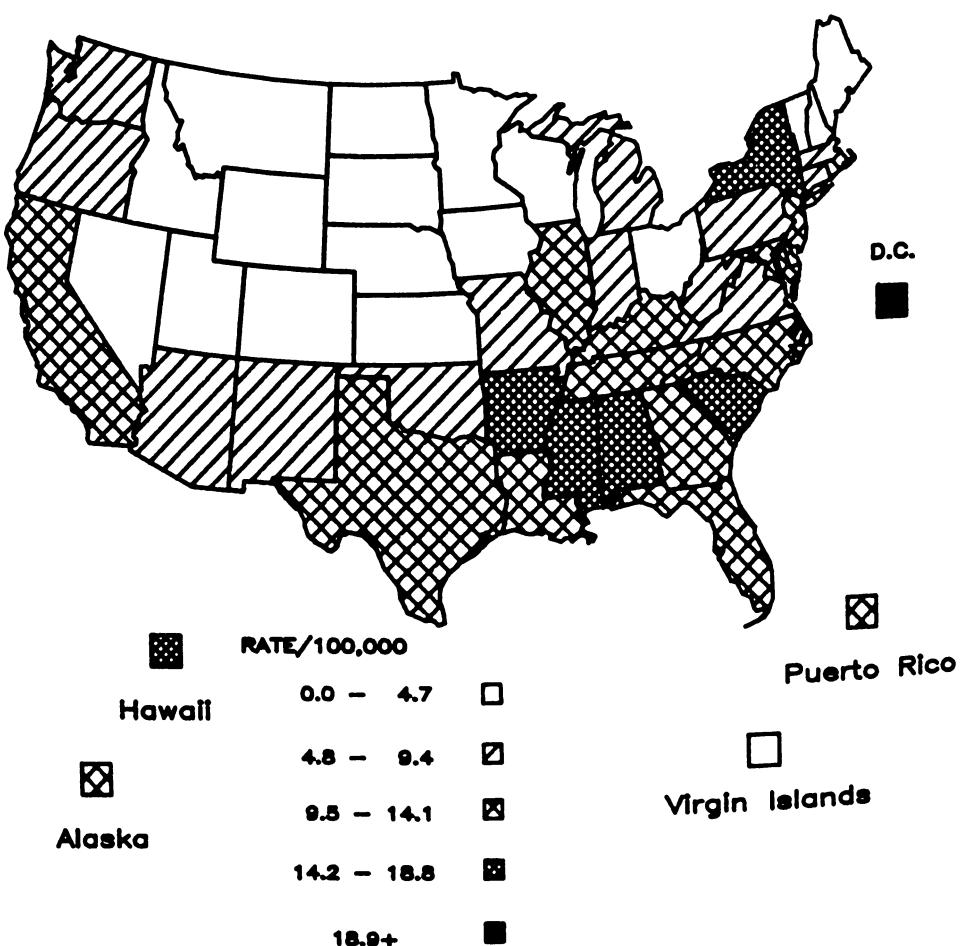

## TUBERCULOSIS — Cases, United States-born and foreign-born, 1986

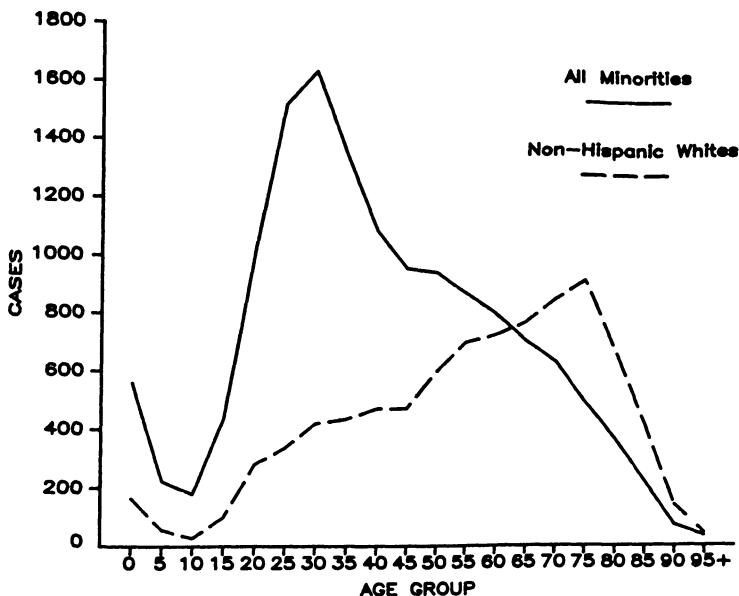

## GRAPHS AND MAPS

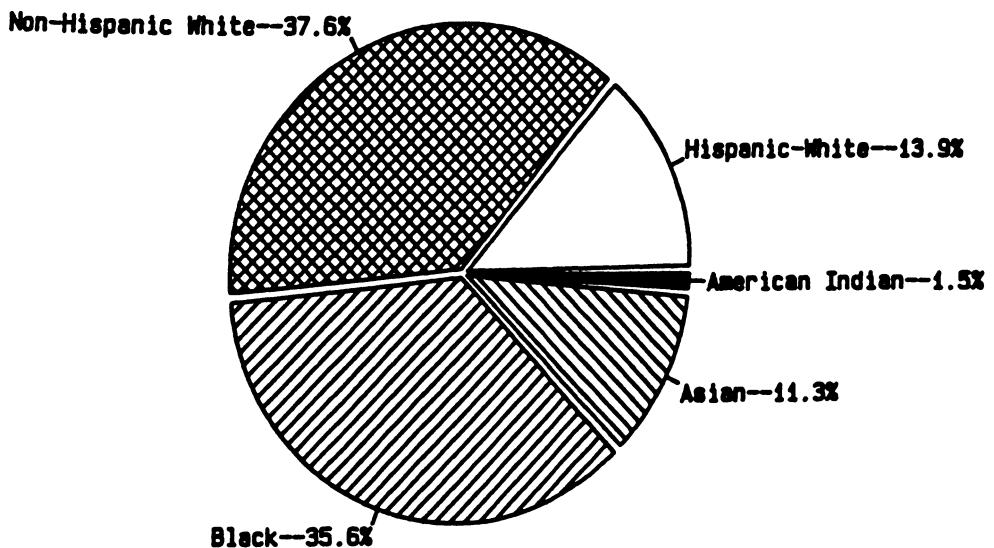

### TUBERCULOSIS – Rates, by state, United States, 1986

**TUBERCULOSIS – Frequency distribution of cases by age, race, and ethnicity, United States, 1986**

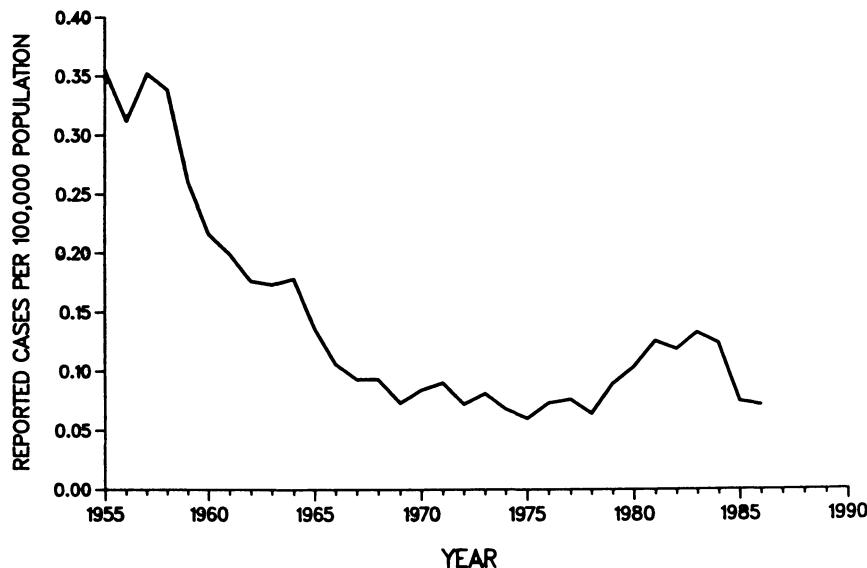

**TUBERCULOSIS – Percentage of cases by race and ethnicity, United States, 1986**

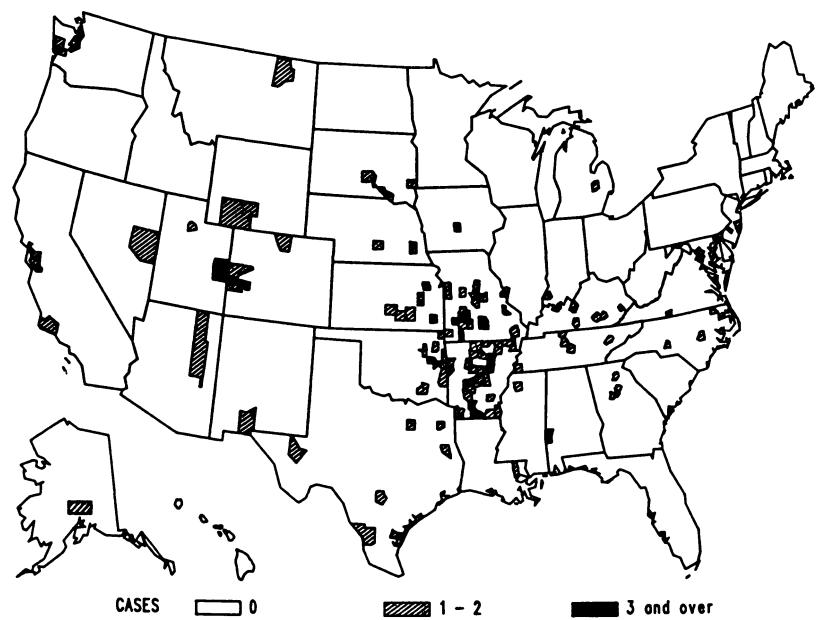

## GRAPHS AND MAPS

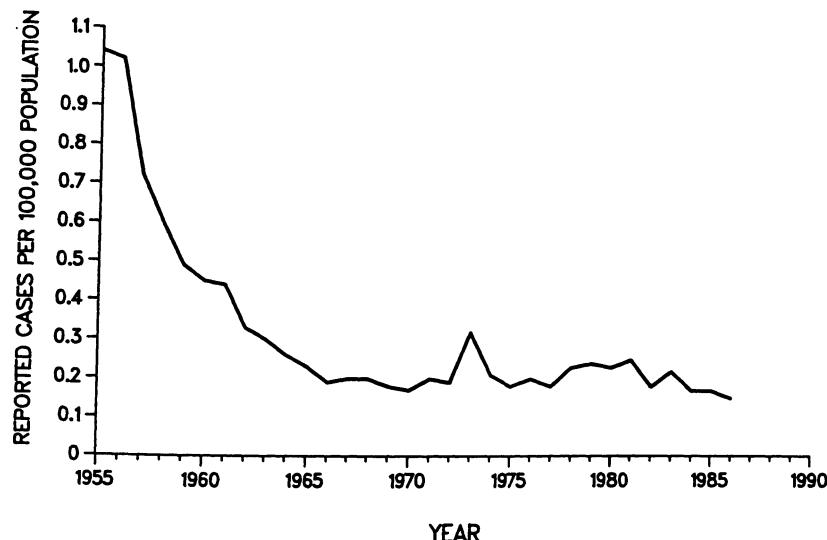

### TULAREMIA – By year, United States, 1955-1986

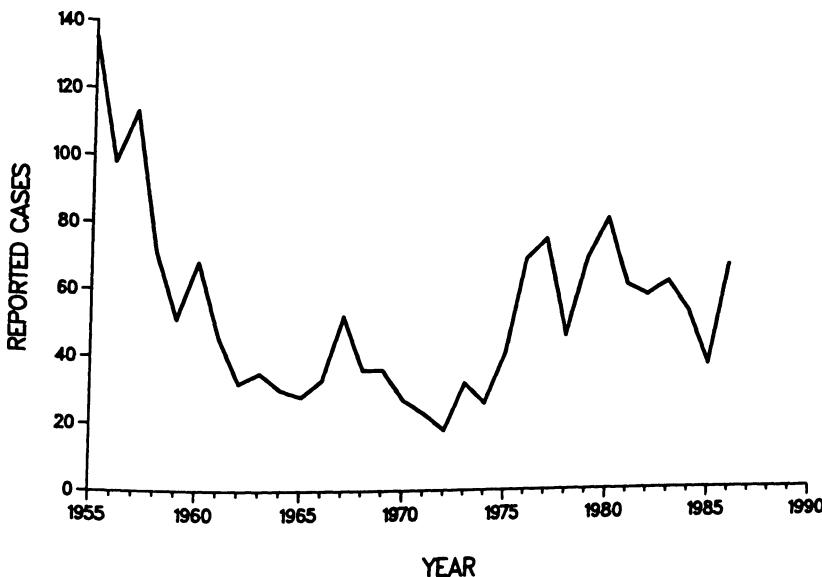

### TULAREMIA – Reported cases, by county, United States, 1986

TYPHOID FEVER — By year, United States, 1955-1986

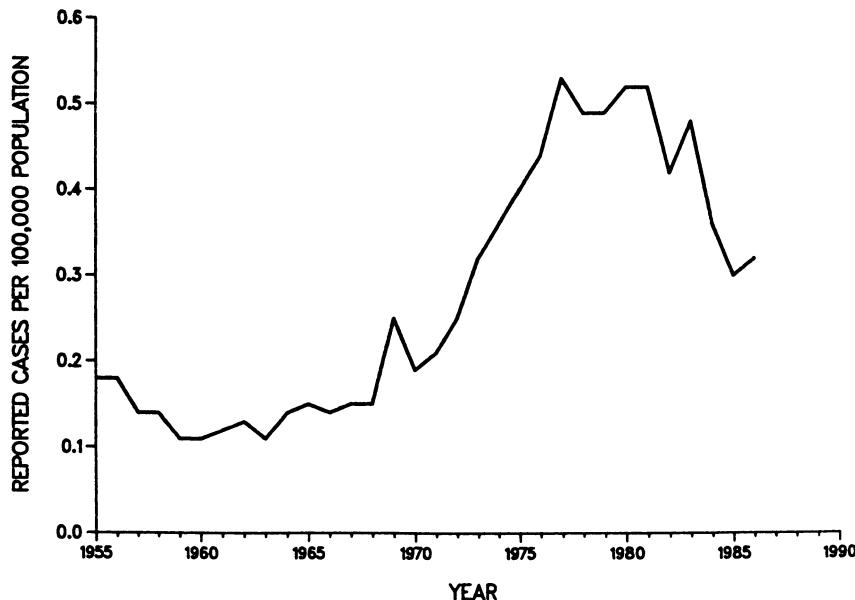

TYPHUS FEVER, FLEA-BORNE (endemic, murine) — By year, United States, 1955-1986

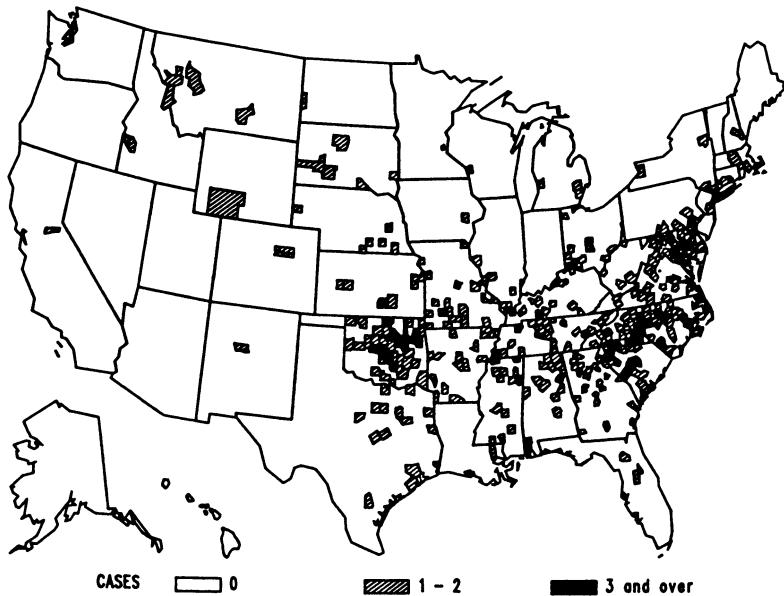

AND MAPS

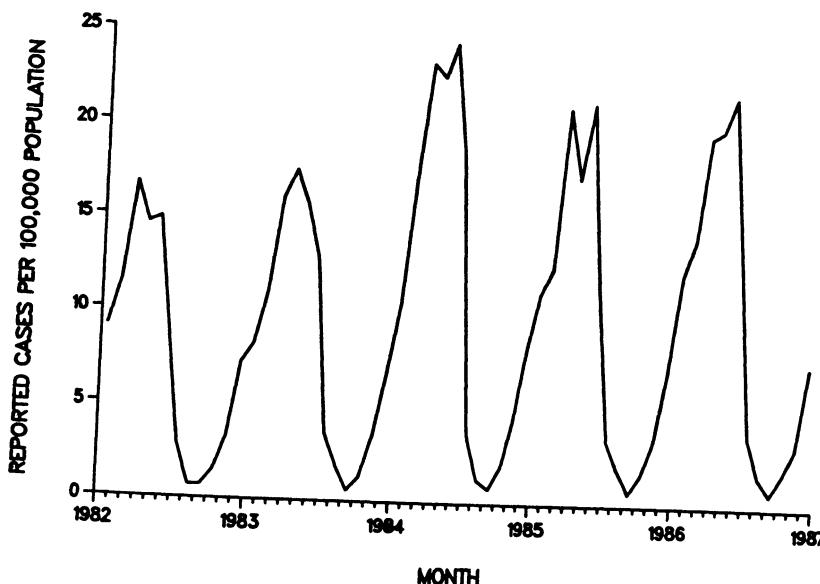

**TYPHUS FEVER, TICK-BORNE (Rocky Mountain spotted fever) — By year, United States, 1955-1986**

**TYPHUS FEVER, TICK-BORNE (Rocky Mountain spotted fever) — Reported cases, by county, United States, 1986**

VARICELLA (chickenpox) — By month, United States, 1982-1986

# **Historical Summary Tables**

**TABLE 1. NOTIFIABLE DISEASES—Summary of reported cases, United States, 1977-1986**

**Yellow fever**

\*Not previously noted.

<sup>a</sup>Data for 1984-1986 reflects change in categories for tabulating encephalitis reports. Cases for 1984-1986 are recorded by date of report to state health departments. Data for previous years are from surveillance records reprocessed.

<sup>1</sup>Reports from New York City are not available. See footnote, Page 6.

\*Data for 1982-1986 recorded by date of report to state health department. Data for all previous years are from surveillance records reported by onset date.

**†**Annual case reports from state health departments; numbers may not reflect changes based on retrospective case evaluations or late reports.

TTanus case reports from state health departments; numbers may not reflect changes based on retrospective case evaluations or late reports. SARS data subsequent to 1974 are not comparable to prior years due to changes in reporting criteria which became effective in 1996.

~~SS Case data subsequent to 1974 are not comparable to prior years due to changes in reporting criteria which became effective in 1975.~~

For more information about the study, please contact the study coordinator at 415-350-2841 or email [studycoordinator@sfccc.edu](mailto:studycoordinator@sfccc.edu).

Note: Rates less than 0.01 after rounding are shown as 0.00.

Population data from those states where diseases were not notifiable (NN) or not available (NA) were excluded from rate calculation. Civilian resident population was used for chancroid, gonorrhea, granuloma inguinale,

lymphogranuloma venereum, and syphilis.

\*Not previously notifiable nationally.

†Per 1,000 live births.

Last documented case occurred in 1949.

Last indigenous case reported 1911; last imported, 1924.

\*Arthropod-borne encephalitis and other non-arthropod-borne viral diseases of the central nervous system.

Source: National Center for Health Statistics, *Vital Statistics of the United States*, Vol. II, Part A, for 1975-1982. Unpublished final data, National Center for Health Statistics, 1983-1984.

Deaths are classified according to the Eighth Revision, ICD, for 1975-1978 and according to the Ninth Revision, ICD, for 1979-1984. Discontinuities for some causes may result due to the introduction of the Ninth Revision.

## State and Territorial Epidemiologists and State Laboratory Directors

The contributions of the State and Territorial Epidemiologists and the State Laboratory Directors to this report are gratefully acknowledged. The persons listed were in the positions shown as of July 15, 1987.

State	Epidemiologists	Laboratory Directors
Alabama	Charles H. Woernle, MD	James L. Holston, Jr., DrPH
Alaska	John P. Middaugh, MD	Vacant
Arizona	Steven J. Englender, MD, MPH	Jon M. Counts, DrPH
Arkansas	Thomas C. McChesney, DVM	Robert L. Horn
California	Kathleen H Acree, MDCM, MPH	G. W. Fuhs, DrSciNat
Colorado	Richard E. Hoffman, MD, MPH	Ronald L. Cada, DrPH
Connecticut	James L. Hadler, MD, MPH	Jesse Tucker, PhD
Delaware	Paul R. Silverman, DrPH	Mahadeo P. Verma, PhD
District of Columbia	Martin E. Levy, MD, MPH	James B. Thomas, ScD
Florida	Michael H. Wilder, MD, Acting	Eldert C. Hartwig, ScD
Georgia	R. Keith Sikes, DVM, MPH	Frank M. Rumph, MD
Hawaii	Christine Nevin-Woods, DO, MPH	Vernon K. Miyamoto, PhD
Idaho	Charles D. Brokopp, DrPH	Darrell W. Brock, DrPH
Illinois	Byron J. Francis, MD	Robert Coe, Acting
Indiana	Charles L. Barrett, MD	Greg Hayes, PhD
Iowa	Laverne A. Wintermeyer, MD	W. J. Hausler, Jr., PhD
Kansas	Robert French, Acting	Roger H. Carlson, PhD
Kentucky	J. Michael Moser, MD, MPH	Cecil Webb, MS
Louisiana	Joyce B. Mathison, MD	Henry Bradford, PhD
Maine	Kathleen F. Gensheimer, MD	Philip W Haines, DrPH
Maryland	Ebenezer Israel, MD, MPH	J. Mehsen Joseph, PhD
Massachusetts	George F. Grady, MD	Ralph Timperi, MPH
Michigan	Kenneth R. Wilcox, Jr., MD	George R. Anderson, DVM
Minnesota	Michael T. Osterholm, PhD, MPH	Robert Linder, MD, PhD
Mississippi	Fred E. Thompson, MD, MPH	R. H. Andrews, MPH
Missouri	H. Denny Donnell, Jr., MD, MPH	Eric Blank, DrPH
Montana	Judith K. Gedrose, MN	Douglas Abbott, PhD
Nebraska	Paul A. Stoesz, MD	John Blosser
Nevada	George E. Reynolds, MD, Acting	George E. Reynolds, MD
New Hampshire	Eugene Schwartz, MD	Veronica C. Malmberg
New Jersey	William E. Parkin, DVM, MPH	Shahedy I. Shaheid, PhD
New Mexico	Harry F. Hull, MD	Loris W. Hughes, PhD
New York City	Stephen Schultz, MD, MPH	Paul S. Maye, DSc
New York State	Dale L. Morse, MD, MS	Herbert W. Dickerman, MD, PhD
North Carolina	J. N. MacCormack, MD, MPH	Mildred A. Kerbaugh
North Dakota	James L. Pearson, DrPH	Jane S. Robb, Acting
Ohio	Thomas J. Halpin, MD, MPH	Gary D. Davidson, DrPH
Oklahoma	Gregory R. Istre, MD	Garry L. McKee, PhD
Oregon	Laurence R. Foster, MD, MPH	Michael R. Skeels, PhD
Pennsylvania	Ernest J. Witte, VMD, MPH	Vern Pidcoe, DrPH
Rhode Island	Barbara A. DeBuono, MD, MPH	Raymond G. Lundgren, Jr., PhD
South Carolina	Richard L. Parker, DVM, MPH	Arthur F. DiSalvo, MD
South Dakota	Kenneth A. Senger	A. Richard Melton, DrPH
Tennessee	Robert H. Hutcheson, MD	Michael W. Kimberly, DrPH
Texas	Charles E. Alexander, MD	Charles E. Sweet, DrPH
Utah	Craig R. Nichols, MPA	Francis M. Urry, PhD
Vermont	Richard L. Vogt, MD	Katherine A. Kelley, DrPH
Virginia	Grayson B. Miller, Jr., MD	Frank W. Lambert, Jr., PhD
Washington	John M. Kobayashi, MD	Jack Allard, PhD
West Virginia	Roy C. Baron, MD, MPH, Acting	John W. Brough, DrPH
Wisconsin	Jeffrey P. Davis, MD	Ronald H. Laessig, PhD
Wyoming	Harry C. Crawford, MD	Donald T. Lee, PhD
Guam	Robert L. Haddock, DVM	Angelina Roman, Acting
Federated States of Micronesia	Eliuel K. Pretrick, MO	Vacant
Marshall Islands	Tony de Brum	Vacant
Northern Mariana Is.*	Jose T. Villagomez, MO	Vacant
American Samoa	Julia L. Lyons, MD, MPH	Vacant
Palau*	Anthony H. Pollio, MO	Vacant
Puerto Rico	John V. Rullan, MD	Raul Baco, MD
Virgin Islands	John N. Lewis, MD	Norbert Mantor
